TREE AND PLANT ORDER SHEET—continued.

Mr.

Kindly

Oblige

Us

By writing on the opposite lines the names of your friends and neighbours, who are interested in gardening, that you think would like to receive a copy of our Catalogues.

To Our Customers

NEW VARIETIES of Special
Merit in FRUIT TREES will
precede General Lists in
this Catalogue.

As usual, our services are
freely offered to those requiring
information re any matter
connected with our business.

IN handing our Catalogue of Fruit Trees, Ornamental Trees and Shrubs, Roses, &c., &c., for 1906, we take the opportunity to tender our hearty thanks to our friends and the public for their kind patronage and recommendation, and assure them of our earnest desire to serve them faithfully and well.

Our Trees, Shrubs and Seedlings are grown under special supervision at our Nurseries, and customers may rely on getting well-rooted, hardy stuff.

Kindly send for our Catalogue of Seeds and Bulbs, issued previous to this, if not already received.

OUR SELECTIONS.—Correspondents may rely on every care being taken to supply Fruit Trees and Plants suitable for the locality and purpose for which they are intended when the selection is left to us. By adopting this course they will ensure a greater amount of satisfaction.

VERY IMPORTANT.

Remittances.—Unknown correspondents are required to forward a remittance with order, or a reliable Sydney reference. Remittances may be made by Cheque, Postal Notes, or P.O. Order, the last being made payable at the G.P.O., Sydney. Stamps may be sent for small amounts, and 6d. exchange must be added to Country Cheques.

Accounts are due monthly.

Seed Potatoes and Manures are sold for net cash only. (Seed Potato List ready in June.)

Overdue Accounts will be handed over for collection if not paid immediately after stamped notice on foot of Statement is posted.

Packing.—Every care is taken in packing and despatching goods in accordance with instructions, and most carefully packed for transmission to any part of the world, so as to ensure their arrival in good order.

Delivery.—All goods are delivered Free at Railway Station and Wharves, Sydney, but our responsibility ceases on procuring a receipt for goods delivered or shipped in good order.

Flower Garden, Shrubbery, &c.

FOR preparation of the soil and planting of deciduous Ornamental Trees, &c., see article immediately preceding lists of Fruit Trees in this Catalogue, headed "Fruit Garden and Orchard."

WHAT we wish to deal with chiefly in this article is the planting of Pot Plants, and we trust the directions here given may be the means of enabling the amateur to carry out the operation successfully.

CARE should be used in selecting plants that are suitable for the soil and climate for which they are intended, and preference should be given to good healthy young plants, as those of large growth are frequently pot-bound, and unfit for planting.

The ground having been got ready, the positions of what might be termed "permanent plants" should be marked out with stakes. Select a calm, moist day, if possible, and see that the plants have been thoroughly moistened the night before; place them beside the stakes in their respective positions, open a hole sufficiently large only to admit the roots freely (it is a mistake to open all the holes before commencing to plant, as the soil gets dry, and failures often occur in consequence); fix the spade in the ground; take a pot in the left hand, turn it upside down, allowing the stem of the plant to go between the first and middle fingers, place the right hand on the bottom of the pot, and tap the edge of the pot against the handle of the spade, when plant and earth will come clean out of the pot; remove the drainage from the bottom of the ball, and take some of the soil from the top, and loosen out the roots with a pointed stick. Should the plant, however, have only recently been potted, the ball need not be disturbed; but if the roots have become matted round the ball inside the pot so that they cannot be readily loosened out, then they should be cut with a knife from top to bottom in two or three places, and the roots released. Plants can never do well if planted with the roots matted round the ball; place the ball so prepared in the hole, spreading out the roots, and draw the soil carefully round the ball, pressing it first with the hands and then with the foot; do not place the plant any deeper in the ground than it was originally in the pot; a little finely-prepared soil and manure mixed together and incorporated with the soil round the plant, say a spadeful to each, will be of great advantage. Before finally levelling the soil round the plants, give each sufficient water to settle the soil about the roots. Plants likely to be affected with the wind should be carefully and firmly staked as soon after planting as possible; for this purpose prepare suitable stakes, point and char the bottom ends, and drive them firmly in the ground close to the plants, taking care not to injure the roots; then tie with some suitable material firmly round the stake and loosely round the stem of the plant, making two distinct ties. Each plant should be tied in two places, one near the top and the other half way down; this prevents the plant from being worked about by the wind. In transplanting large evergreen plants from the open ground or nursery, it is desirable to leave some earth adhering to the roots; and should the ground be dry they should receive a good soaking with water two or three days before being lifted. All injured roots should be removed with a good sharp knife, and the roots spread out; this applies to all plants, deciduous as well as evergreen, when transplanted from the open ground. Pot plants may be planted out with perfect safety from March to October, and with a little extra care during the remaining months of the year. The best months for transplanting large evergreen plants are March, April, August and September; but they should only be removed when the soil is in good order. The best months for planting deciduous trees from open border are May, June and July. The formal or permanent plants being disposed of, those of less importance, or at least of a less permanent character, may be planted at intervals throughout the garden. In selecting plants for their various positions care should be taken to place the tallest growing farthest away from the walks, and so on, leaving those of dwarfiest habit for positions nearest the walks. Care should also be taken to arrange plants so as to diversify time of flowering, habit, colour, foliage, etc., as much as possible, otherwise the general effect is, to a certain extent, marred. When the planting is completed, the whole surface should be carefully raked and cleaned up. Spaces can always be found for planting bulbs and sowing flower seeds at the proper seasons. Should the weather prove dry about October or November, mulching will be found of the greatest advantage; this should be done as follows:—Break up the soil to a depth of three or four inches with a fork or hoe, and spread any light fertilizing material, such as stable straw, decayed leaves, cow manure broken up fine, grass, etc., over the whole surface; or if scarce it may be placed round such plants as may be considered the most valuable, covering a space of equal diameter to the height of the plant; the mulch should be dug or chipped in about April. Tender plants may also be greatly assisted by placing a few ti-tree or other fine-leaved bushes round them directly after planting; this affords shelter and shade, and should be removed as soon as the plant is thoroughly established, say in two or three months.

Should it be found necessary to water plants during the Summer months, small drills four to six inches deep should be run at intervals throughout the garden, and water kept in them until the soil is thoroughly soaked; one good watering of this kind is better than any number of sprinklings overhead; in fact, these latter often do more harm than good. As a rule water should be applied in the morning in Winter, and in the evening in Summer.

It is essential that thorough shelter should be provided. The West and South are the two points which should be guarded against. When judiciously done, a shelter-belt may be made largely to contribute to the beauty and attractiveness of the garden. Efficient shelter may be provided for small gardens by planting a neat hedge, which when well kept is a real ornament. Shelter for gardens of large extent can be provided by planting an ornamental belting, in which can be included a variety of beautiful flowering Shrubs, combined with Conifers of various kinds, many of which are highly attractive. For large shelter trees *Pinus insignis* stands unrivalled; its rapidity of growth, great beauty, and adaptability as a shelter tree render it at once the most desirable of all shelter trees.

All vacancies in Flower Gardens should be sown with Flower Seeds.

Conifers and Taxads

EITHER as regards general ornamentation or for commercial purposes, this section is, perhaps, the most important. For the most part Conifers will flourish in any part of Australia, are admirably adapted for shelter, and do not require rich soils. We give the approximate height; but soil, aspect, climate and other conditions materially affect the growth. As in other sections, we prefer limiting our collections to those kinds only which from long experience we are able to recommend.

Name.	Ht. in ft.	s.	d.
Araucaria Bidwilli (Bunya Bunya) ...	150	1	6
„ braziliensis ...	80	1	6
„ Cooki (Cook's pine) ...	100	1	6
„ Cunninghami (Moreton Bay pine) ...	100	1	6
„ imbricata (the Monkey Puzzle) ...	50	1	6
An exquisite Pine, specially adapted for cooler districts.			
„ excelsa (Norfolk Island pine) ...	150	1	0

Useful for general planting in parks, pleasure grounds, avenues, or as single specimens. Bidwilli (Bunya Bunya), of Queensland, is a noble spreading tree, with deep green foliage. Cooki (Cook's pine), New Caledonia, a very graceful and symmetrical tree. Cunninghami (Moreton Bay pine), Excelsa (Norfolk Island pine), one of the noblest trees in the world, will flourish on the sea shore, or in any fairly good soil.

Callitris Australis (Australian Cypress) ...	130	1	6
---	-----	---	---

Elegant hardy tree.

Cedrus atlantica (Mt. Atlas cedar) ...	100	1	6
„ deodara (Indian cedar) ...	150	1	6
„ libani ...	100	1	6

Most beautiful and graceful trees of moderate growth, can hardly be misplaced.

Cryptomeria elegans ...	60	1	0
„ japonica (Japan cedar) ...	100	1	0

Elegans is a graceful half-tree, foliage varying from bright green in Summer to bronze in Winter.

Cupressus—			
„ Benthamiana (cypress) ...	70	1	0
„ Corneyana ...	50	1	0
„ funbris ...	60	1	0
„ Goveniana ...	25	1	0
„ Knighti (Elegans) ...	30	1	0
„ Lambertiana (spreading) ...	100	1	6
„ „ aurea ...	50	2	6
„ Lawsoniana ...	100	1	0
„ macrocarpa (Lemon scented) ...	100	1	0
„ pendula (Weeping) ...	60	1	0
„ sempervirens (upright cypress) ...	50	1	0
„ „ horizontalis (spreading) ...	50	1	0
„ torulosus ...	100	1	0

An elegant section of the Conifer family, and should occupy a prominent place in all plantations; hardy in any part of Australia.

Juniperus africanus ...	4	1	6
„ bermudiana (Pencil cedar) ...	30	1	6
„ chinensis ...	50	1	6
„ hibernica (Irish juniper) ...	15	1	0
„ virginica (Red cedar) ...	50	1	6

Hardy, graceful and most useful for general ornamentation.

Name.	Ht. in ft.	s.	d.
Pinus austriaca (Austrian pine) ...	100	1	6
„ canariensis ...	50	1	0
„ excelsa ...	70	1	6
„ halepensis (Aleppo pine) ...	150	1	0
„ insignis (remarkable pine) ...	100	1	0
„ maritima ...	50	1	0
„ pinea (stone pine) ...	60	1	0
„ pinaster (cluster pine) ...	60	1	0
„ Sylvestris (Scotch fir) ...	100	1	6

This family is, without doubt, the best for shelter purposes, the small wire-like leaves being better adapted for destroying the force of the wind than any other; they are extremely hardy, and will grow in any fairly good soil.

Podocarpus spinulosus (Illawarra pine) ...	80	1	6
„ elata ...	30	1	6

Handsome, ornamental trees, requiring fairly good soil, with shelter. Spinulosus is known as the Australian Yew.

Retinospora ericoides ...	15	1	6
„ plumosa ...	15	1	6

Beautiful dwarf trees, of quick growth, from Japan; suitable for cold districts.

Salisburia adiantifolia (Maiden hair) ...	100	1	6
--	-----	---	---

A handsome tree, with fine foliage; suitable for the coldest districts.

Taxus baccata (Yew) ...	20 to 30	1	6
„ argentea variegata ...	2	0	

Striped with silvery white, sometimes changing to straw colour; a very charming variety.

Thuya lobbi (Gigantea) ...	100	1	6
„ occidentalis ...	20	1	0
„ orientalis ...	40	1	0
„ „ aurea ...	8	1	6
„ „ variegata ...	15	1	6

A hardy and very useful tribe of plants. Aurea forms a very compact and beautiful shrub, and can hardly be misplaced.

Thujopsis dolabrata ...	80	1	6
„ „ variegata ...	30	1	6

Handsome, compact growing trees, of graceful habit.

Wellingtonia gigantea ...	400	1	6
----------------------------------	-----	---	---

The big tree of California; said to be the largest tree in the world. Requires cold elevated positions, grows fast, and looks a tree from the start; a grand ornamental tree.

As shelter trees the Pine tribe is unsurpassed.

Trees, Shrubs and Flowering Plants

IN this section will be found Plants suitable for every description of ornamentation, from the cottage plot to the forest. Selection for any purpose, however, is rendered simple by the explanations given in the various columns. *E* indicates Evergreen; *D*, Deciduous.

*Hardy in climates similar to that of Sydney. Those not marked may be regarded as hardy in Australia.

Arundo donax variegata.

Name.	Colour.	Ht. in ft.	Class	s.	d.
Abelia uniflora , lilac		4	E	1	0
Neat flowering shrub.					
Aberia caffra (Kaffir-apple) ...		20	E	1	6
Abutilon Boule de Neige , pure white, very distinct ...		5	E	1	0
„ Eclipse , common veined purple		4	E	1	0
„ Golden Fleece , bright yellow		4	E	1	0
„ Sawitzi , variegated foliage ...		4	E	1	6
„ Souvenir de Bonn , variegated foliage ...		4	E	1	0
„ Thompsoni , orange, with variegated foliage ...		6	E	1	0
„ Thompsoni , fl. pl. double flowers, orange ...		4	E	1	0
„ vexillarium , variegata ...		3	E	1	0
Most desirable border plants, being of rapid growth; free and continuous bloomers, and very hardy.					
Acacia Baileyana , yellow, (silver wattle)		20	E	1	0
„ cultrifornis , orange		6	E	1	0
„ elata , pale yellow		30	E	1	0
„ pycnantha , (golden wattle) ...		20	E	1	0
Most graceful and beautiful tribe of plants, of rapid growth.					
Acer campestre		25	D	1	0
„ colchicum rubrum		30	D	1	6
„ disectum (Japanese Maples) ...		10	D	2	6
„ negundo (Maple)		50	D	1	0
„ „ folius variegatus		30	D	2	6
„ platanoides (Norway Maple) ...		50	D	1	0
„ pseudo platanus (Sycamore) ...		50	D	1	0

Grand ornamental trees, suitable for the cold districts of the State. Negundo is one of the most chaste and beautiful variegated plants in cultivation.

Acmena pendula	50	E	1	6
Highly ornamental and graceful, pendula forms a splendid spreading tree with drooping habit; likes moist sheltered positions.				
Æsculus hippocastanum , white (Horse Chestnut)	40	D	1	0
A grand ornamental flowering tree, requires a cold climate and good soil.				

Name.	Colour.	Ht. in ft.	Class	s.	d.
Agave americana variegata ...		6	E	1	0
„ glaucescens		6	E	1	0
Very hardy; admirably adapted for vases or ornamental rockery.					
Agnostus (See <i>Stenocarpus</i>)					
Ailanthus glandulosa (tree of Heaven)		20	D	1	0
Useful for dry situations; fine foliage.					
Alder (See <i>Alnus</i>)					
Alectron excelsum (New Zealand Oak)		20	E	1	0
A handsome tree with fine foliage.					
Alnus capensis (Alder)		20	D	1	6
Allamanda nerifolius , yellow ...		4	E	1	6
A useful hardy shrub					
Aloysia citriodora (Sweet Verbena)			D	1	0
A delightful perfume.					
Aloe , several varieties			E	1	0
Allspice Tree (See <i>Calycanthus</i>)					
Andromeda phillyræfolia , white		2	E	1	6
Beautiful dwarf flowering shrub.					
Aralia papyrifera		10	E	1	0
„ sieboldi		10	E	1	0
„ spinosa		8	D	1	6
Fine, fast-growing plants, with handsome foliage.					
Arbutus canariensis , white ...		20	E	1	6
„ unedo , white (Strawberry tree)		10	E	1	6
Beautiful ornamental shrubs, producing a profusion of pretty white bell flowers; very hardy.					
Ardisia crenulata , bearing scarlet berries		1½	E	1	6
„ „ alba , white berries		1½	E	1	6
Very attractive pot plants.					
Arundo donax variegata		10	E	1	6
Handsome variegated-leaved plant; very hardy.					
Ash (See <i>Fraxinus</i>)					
Aster argophyllus , white (Musk tree)		20	E	1	6
Produces a wonderful musk perfume; prefers good moist soil.					
Aucuba japonica		4	E	1	0
Beautiful shrub, with very attractive foliage; will grow under shade and in cold positions.					
Azalea (See <i>Special List</i>)					

Plant Trees and Plants the same depth as before removal.

Trees, Shrubs and Flowering Plants—continued.

Name.	Colour.	Ht. in ft.	Class.	s.	d.
Backhousia myrtifolia , white ...	...	20	E	1	6
A beautiful flowering dwarf tree, with myrtle-like foliage; handsome flowers.					
Balfourea pittosporoides ...	...	15	E	1	0
* Bambusa arundinacea (Bamboo) ...	...	80	E	2	6
* " fortunei , variegata ...	...	12	E	1	6
* " gracilis ...	...	12	E	1	6
* " nigra (Black Bamboo) ...	...	12	E	1	6
Hardy, graceful trees, useful for plant sticks.					
* Barkleya syringæfolia , yellow ...	...	10	E	1	6
A gorgeous flowering shrub.					
Barleria Arnottiana , white ...	...	3	E	1	0
" obtus , blue ...	...	3	E	1	6
Dwarf, compact flowering shrubs.					
* Bauhinia purpurea , pink ...	...	25	E	1	0
" alba (Mountain Ebony) ...	...	15	E	1	6
Showy, flowering plants; require warm situations.					
Beech (<i>See Fagus</i>)					
Benthamia fragifera , white ...	...	15	E	1	6
Hardy and very ornamental, with scarlet fruit.					
Berberis Darwini , yellow ...	...	4	E	1	6
" japonica , yellow ...	...	6	E	1	6
Boronia megastigma , brown ...	...	5	E	1	6
" serrulata , red (Native Rose) ...	...	4	E	1	6
Megastigma is perhaps the strongest perfumed flower in existence, and Serrulata is the well-known Native Rose; both are attractive flowering plants.					
Bottle Brush (<i>See Callistemon</i>).					
Bouvardia (<i>See Special List</i>).					
Box (<i>See Buxus</i>).					
Brachychiton acerifolia (Flame Tree) ...	...	100	E	1	0
A grand ornamental tree, with handsome foliage, and producing a perfect blaze of scarlet flowers.					
Brassia actinophylla ...	...	15	E	1	6
Large shrub, with handsome foliage.					
Broom (<i>See Genista and Spartium</i>).					
Browallia Jamiesoni , orange ...	...	6	E	1	0
Useful shrub, constantly in bloom.					
Brugmansia Knighti , white ...	...	10	E	1	0
Free growing shrubs, constantly in bloom.					
Buddlea globosa , yellow ...	...	10	E	1	0
" Lindleyana , blue ...	...	6	E	1	0
Rapid growing plants, suitable for covering unsightly objects.					
Buxus arborea , white ...	...	20	E	1	0
" sempervirens (Box) ...	...	6	E	1	0
" variegata ...	...	3	E	1	6
Neat, compact shrubs. Sempervirens is the variety used for edgings.					
Calliandra Portociensis , white ...	...	10	E	1	6
One of the most peculiar and remarkable flowering shrubs; very elegant.					
Callistemon lanceolatus , scarlet ...	...	6	E	1	0
A brilliant flowering shrub; likes moisture.					
Calodendron capense (Cape Chestnut) ...	...	30	E	1	0
A graceful tree, producing black shining seeds, used for ornaments, etc.					
Galicarpa rosea ...	...	3	E	1	6
Calycanthus floridus (All-spice) ...	...	3	E	1	6
Very hardy, sweet-scented flowering shrub.					
Camellia (<i>See Special List</i>).					
Camphora officinalis (Camphor) ...	...	50	E	1	0
Splendid ornamental trees, the Camphor of commerce.					
Canna , a fine Collection, 6s doz. (<i>See Special List</i>).					
Cantua buxifolia (dependens), rose ...	...	4	E	1	6
Very beautiful flowering shrubs.					
Carob Tree (<i>See Ceratonia</i>).					
Cassia decandollana , yellow ...	...	12	E	1	0
Brilliant flowering shrub, very striking and attractive.					

Name.	Colour.	Ht. in ft.	Class.	s.	d.
Castanea vesca (Spanish Chestnut) ...	...	15	D	1	0
Castanospermum australe , saffron ...	...	75	E	1	0
Moreton Bay Chestnut; highly ornamental and very attractive when in flower.					
Catalpa syringæfolia , lilac ...	...	20	D	1	0
Ceanothus divaricatus , blue ...	...	6	E	1	6
" americanus , blue ...	...	6	E	1	6
Splendid flowering plants for cold climates; continually in bloom.					
Celtis occidentalis , white ...	...	20	E	1	0
Cerasus lauro cerasus , white (Laurel) ...	...	12	E	1	0
" lusitanica , white (Portugal Laurel) ...	...	15	E	1	0
Beautiful ornamental shrubs of rapid growth.					
Ceratopetalum gummiferum , pink ...	...	40	E	1	6
The well-known and beautiful Christmas Tree of Australia.					
Ceratonis siliqua (Carob Tree) ...	...	15	E	1	6
Fine, hardy, ornamental tree, producing edible beans.					
Cercis siliquastrum (Judas Tree), red ...	...	20	E	1	6
Cestrum aurantiacum , orange ...	...	8	E	1	0
" diurnum , white ...	...	16	E	1	0
" nocturnum , white ...	...	6	E	1	0
" scabra , purple ...	...	6	E	1	0
Profuse flowering shrubs. Nocturnum has a very powerful perfume at night.					
Chilianthus disophyllus ...	...	6	E	1	0
A useful hardy shrub, of quick growth.					
Chinese Lantern (<i>See Abutilon</i>).					
Chinese Rose (<i>See Hibiscus</i>).					
Choisia ternata (Mexican Orange Flower) ...	...	3	E	1	6
white ... A neat little border shrub, perfumed.					
Chorozema cordata , orange and red ...	...	2	E	1	6
A beautiful flowering shrub.					
Christmas Bush (<i>See Ceratopetalum</i>).					
Christia grandiflora , buff and red ...	...	3	E	1	6
An interesting little border shrub.					
Cigar Plant (<i>See Cuphea</i>).					
Citharexylum quadrangulare ...	...	15	E	1	0
A very hardy dwarf tree of rapid growth.					
Clerodendron fragrans , white ...	...	16	E	1	0
" trichotomum , white ...	...	6	E	1	6
Hardy shrubs, flowers white and fragrant, nice foliage; beautiful plants.					
Clanthus puniceus , scarlet ...	...	6	E	1	0
" albus , white ...	...	6	E	1	0
Gorgeous flowering shrubs, can be trained as climbers.					
Clethra arborea (Lily of the Valley Tree) ...	...	8	E	1	6
A beautiful shrub, of compact growth, bearing racemes of pure white flowers, similar to the Lily of the Valley.					
Coffea arabica (Coffee) ...	...	4	E	2	0
A handsome shrub, with fine foliage.					
Colletia Bictonensis , white ...	...	5	E	1	6
Coprosma Baueriana variegata ...	...	6	E	1	6
" picturata ...	...	6	E	1	0
Handsome shrubs, very hardy.					
Coral Tree (<i>See Erythrina</i>).					
Coronilla emeris , red ...	...	3	D	1	6
" glauca , yellow ...	...	3	E	1	0
Hardy Winter flowering shrubs.					
Corynocarpus laevigatus ...	...	15	E	1	0
A most attractive hardy shrub, with beautiful glossy green foliage.					
Cotoneaster Simmondsi ...	...	4	E	1	0
Hardy shrub, bearing scarlet berries.					
Cratægus, oxycantha , double white ...	...	12	D	1	0
" " " red ...	...	12	D	1	0
" " " pink ...	...	12	D	1	0

The roots will always strike down after moisture.

<i>Moonflower</i> (See <i>Ipomæa</i>).	...	...	...	...	...
* <i>Passiflora Empress Eugene</i> , lilac	...	30	E	1	6
" <i>Fragrant Beauty</i>	...	20	E	1	6
" <i>racemosa</i> , scarlet	...	20	E	1	6
Fast growing, with most attractive flowers.					
<i>Phaseolus caracalla</i> (Snail Flower)	...	...	...	...	...
lavender	...	30	E	1	0
One of the finest climbers, producing a profusion of blooms of curious snail-like form.					
* <i>Quisqualis indica</i> , red	...	20	E	1	6
A neat and graceful plant.					
<i>Rhynchospermum jasminoides</i> , white	...	10	E	1	0
" <i>variegata</i>	...	6	E	1	6
" <i>radicans</i>	...	10	E	1	0
" <i>variegata</i>	...	10	E	1	6
Exceedingly pretty and fragrant flowers.					
<i>Snail Flower</i> (See <i>Phaseolus</i>).	...	...	...	...	...
<i>Solanum jasminoides grandiflora</i> , white	...	20	E	1	0
" <i>Seafortianum</i>	...	15	E	1	6
Beautiful clusters of blue flowers.					
" <i>Wendlandi</i>	...	20	D	1	6
One of the most superb summer flowering vines it is possible to conceive; it blooms continuously, not stray blossoms, each one nearly three inches across, as many as 100 being in a cluster. The color is an attractive shade of lavender blue, strikingly beautiful.					
<i>Solandra Laevis</i> , cream	...	20	D	1	6
" <i>grandiflora</i>	...	20	D	1	6
Large trumpet-shaped flowers, very showy.					
<i>Sollya heterophylla</i> , blue	...	10	E	1	6
<i>Stephanotis floribunda</i> , white	...	10	E	1	6
A beautiful perfumed climber.					
<i>Stigmaphyllon ciliatum</i> , yellow	...	20	E	1	6
Large showy foliage and pretty flowers.					
<i>Tacsonia exoniensis</i> , pink	...	20	E	1	6
" <i>igneae</i> , scarlet	...	20	E	1	6
" <i>mollissima</i> , crimson, edible	...	30	E	1	6
" <i>Van Volxemi</i> , crimson	...	20	E	1	6
Cannot be surpassed as large, quick growing climbers, with very handsome flowers like passion flowers, with very brilliant colours.					
<i>Tecoma radicans</i> , scarlet	...	20	D	1	0
<i>Thunbergia coccinea</i> , scarlet	...	20	E	1	0
" <i>grandiflora</i> , lilac	...	20	E	1	0
Splendid fast growing climbers.					
<i>Vinca major</i> , variegata (Periwinkle), blue	...	6	E	1	0
Free flowering old English favourite.					
<i>Virginian Creeper</i> (See <i>Ampelopsis</i>).	...	...	...	...	...
<i>Vitis antarctica</i> , white	...	50	E	1	0
<i>Wax Flower</i> (See <i>Hoya</i>).	...	...	...	...	...
<i>Wistaria megasperma</i> , lilac	...	60	E	1	6
" <i>sinensis</i> , lilac	...	20	D	1	0
" <i>alba</i> , white	...	20	D	1	6
" <i>fl. pl.</i> , blue	...	20	D	1	6
Gorgeous and profuse flowerers, very strong growers and hardy.					

Climbers should be freely planted in every garden.

Herbaceous and Soft-wooded Plants.

THIS section should be largely represented in every collection, comprising, as it does, the most brilliant and easily cultivated of all flowering plants; it also includes beautiful foliage plants. A judicious selection will render a garden gay with flowers and foliage the whole year round. Many species are well adapted for pot culture for verandahs or conservatory. Choice selections from 9s per dozen.

Name.	Colour.	s.	d.
Acanthus mollis , purple	...	1	0
Showy flowering plant, with ornamental foliage.			
Achyranthes aurea reticulata	...	1	0
herbsti	...	1	0
Neat border plants with pretty variegated foliage.

Graceful plant, with pretty striped leaves.			
Pœonia officinalis , varieties	...	1	6
Magnificent flowering plants, producing a profusion of brilliant coloured flowers, often as large as a teacup.			
Pampas Grass (see <i>Gynerium</i>).	...	1	0
Pitcarnea floccosa , blue (3 feet)	...	1	0
Romneya Coulteri (6 feet)	...	1	6
This is without doubt the finest herbaceous perennial known. It is a native of California (commonly called the Californian Poppy). It is a very attractive flower, but yet little known; the flowers are pure white, with yellow centre, the petals of which resemble crinkled tissue paper. As a cut flower it is excellent, lasting long in water. In England it is termed the herbaceous perennial of the first water.			
Rudbeckia fulgens , orange and black	...	1	0
Golden Glow , yellow	...	1	0
G. Glow is a very showy variety, being covered with double golden yellow flowers.			
Salvia —			
Bethelli , pink	...	1	0
Chanticleer , scarlet	...	1	0
farinacea , light blue	...	1	6
Glory of Stuttgart , dwarf, scarlet	...	1	0
grandiflora , scarlet	...	1	0
ianthina , dark purple	...	1	0
Rudolph Pfitzer , scarlet	...	1	0
silverspot , dwarf, variegated foliage, scarlet	...	1	0
splendens , scarlet	...	1	0
Weberi , carmine	...	1	0
These lovely plants are the most brilliant summer flowering imaginable. We can do these in rooted cuttings from September to January at 3s dozen.			
Shamrock (True Irish)	...	0	6
Spiræa japonica , white	...	1	0
aurea reticulata , white	...	1	6
palmata , rose	...	1	6
Pretty border plants, and also for pot culture.			
Stokesia cyanea	...	1	0
A valuable herbaceous hardy evergreen, producing from Christmas till winter double starry flowers of a lilac-purple colour.			
Tradescantia discolor	...	1	0
Hardy foliage plants, good for rockeries, hanging baskets, &c.			
Zingiber officinalis (true ginger)	...	1	0

Correspondents are invited to report results.

PALMS AND CYCADS

"GRACEFUL and elegant" is a descriptive term for this family, particularly when grouped with Tree Ferns, in moist sheltered situations, and for table or general decoration are indispensable.

FERNS

NOTHING can exceed the beauty and grace of this favourite class of plants. Ferns can be successfully grown almost anywhere with little trouble, shade and moisture being their chief requirements. For table and window decorations they cannot be surpassed.

FERN BASKETS (containing Choice Varieties of Ferns and Lycopods), from 3s. 6d.

JAPANESE FERN BALLS AND DESIGNS, from 1s 6d each.

Nothing surpasses Ferns and Palms for forming a sylvan retreat.

Seedling Annuals and Perennials.

THIS portion of our business is still increasing, and considering the numerous testimonials we received during last season as to the quality of the different lines, we feel sure that our endeavours to keep up a supply of strong healthy seedlings, to meet the requirements of our patrons who wish to avoid the trouble and disappointment often experienced in raising them from seeds, is fully appreciated.

Our sowings this year have been on a much larger scale, and we may add that they are being grown under special supervision at our own nursery, in open beds, exposed to all weathers.

We do not supply less than half-dozen of a sort at 6d per dozen, or quarter-dozen at 1s.

FOR AUTUMN AND WINTER PLANTING. Ready from March to November.

6d per dozen ; per post, 8d. 4s per 100 ; per post, 5s.

You cannot Garden successfully without Shelter.

**Aponogeton distachyon**

(Water Hawthorn).

Flowers to four inches long, beautifully spotted, with a delicious Hawthorn-like perfume, and bright green leaves on long stalks. **1s** each.

Azolla rubra

(Water Fern or Duck Weed).

This beautiful little plant can be grown in a glass globe. It floats on the surface of the water, and its red foliage is very attractive. Clumps, **6d** each.

Limncharis Plumieri

(Water Poppy).

Yellow, Poppy-like flowers, with dark centre. **1s** each.

Nelumbium speciosum.

The sacred Lotus of Japan, producing grand blooms, 10 inches in diameter, of a beautiful rich pink colour. **3s 6d** each.

Aquatic Plants

Nothing can contribute more to the beauty of a home than these lovely Water Plants, which can be grown with very little trouble in Ponds, Tanks, or Tubs.

Nelumbium speciosum alba.

As preceding, but has pure white flowers. **3s 6d** each.

Nymphaea alba.

The Water Lily of Britain, producing beautiful pure white flowers, semi double, very hardy, and most attractive. **1s 6d** each.

Nymphaea dentata.

Beautiful large pure white flowers. **1s 6d** each.

Nymphaea lutea.

The Yellow Water Lily, producing beautiful bright yellow flowers. **1s 6d** each.

Nymphaea stellata.

Flowers blue, very delicately scented; produced in abundance throughout the summer months. **1s 6d** each.

AZALEAS.

These gorgeous Flowering plants will grow readily in moderately moist sandy loam or peat, or in any fairly good soil, sheltered from hot winds. Many of the double and variegated varieties are perfect gems, and should be in every collection.

1s 3d each; **12s** per dozen.

A. Borsig—Pure white, double, very choice variety.

Alba magna—Large white, occasionally striped.

Alexander II.—White striped and splashed scarlet.

Bernard Andrea alba—Double white, very fine.

Charmer—Bright amaranth, distinct.

Coloris nova—Reddish purple, shaded with lilac, very bright and showy.

Comtesse de Flanders—Very large flower, clear satin rose.

Dandeyana—White, free flowering.

Deutsche Perle—Fine double white.

Empress of India—Flowers perfect; the outer segments are gracefully wavy and well expanded; centre carmine, white, and salmony rose, double.

Ernest Benary—Brilliant rosy crimson, fine form, double.

Eugene Mazel—Bright red, shaded with lilac.

Eulalie Van Geert—Rose-edged white.

Fielder's—Very pure white, large.

Lady Poltimore—Pure white, single blooms, above medium size, spotted at the base of petals with small light green spots.

Madame Paul de Schryver—Rosy violet, very fine, double.

Mdlle. Marie Lefebvre—Pure white, good form and substance.

Mdlle. Mollis—In varieties from **2s** each.

Orange Brilliant—Brilliant orange scarlet, very fine.

Princess Charlotte—Very large flower, of a beautiful rose, fine form.

Queen of Beauties—Salmon pink, margined with white and flaked with carmine, densely spotted with crimson.

Roi D' Hollande—Deep scarlet, fine form.

Roi Leopold—Deep salmon, dark spots on upper petals.

Stella—Bright orange scarlet, deep violet stain on upper petal.

Vicomte de Forceville—Large double flower, fine red.

Vittata Punctata—White striped bright scarlet, very showy.

No Plants create greater enthusiasm than well-grown Water Lilies.

BEGONIAS.

Begonia Rex, Variegated Foliage.

Selected Singles, in mixed colours, **9d** each, **6s** doz.

Extra Selected Singles, in separate colours, white, yellow, pink and red shades, **1s** each, **9s** doz.

Shrubby Varieties—Hardy useful flowering plants, either for the open border or for pot culture; constant bloomers. **1s** each; **9s** per doz.

Rex, Variegated Foliage—Beautiful and attractive pot plants, of easy culture; useful for table decoration. Choice varieties. **1s** each; **9s** per doz.

Tuberous Rooted—Gorgeous flowering plants, of easy culture and deserving of extensive cultivation. The flowers range through all shades of colour, and remain in bloom for a long time. The bush-house is the most suitable for them. The colours red, white, pink, yellow, salmon and striped predominate.

Selected Doubles, mixed colours, **1s** each, **9s** doz.

Extra Selected Doubles, in separate colours, white, yellow, pink and red, **1s 6d** each, **12s** doz.

Bouvardias.

EXCEEDINGLY useful dwarf plants, which thrive admirably in our gardens, producing beautiful brilliant flowers almost throughout the year in great profusion, some of which are highly perfumed, and most desirable for bouquets. Peculiarly adapted for gardens of small extent.

1s each; **9s** per dozen (except where otherwise marked).

Alfred Neuner—Double white, sometimes light rose, free flowering.

Beauty of Brisbane—Pure white, an excellent variety, very free bloomer.

Beauty of New South Wales—White, petals large and broad, an excellent variety.

Bocchi—Bright pink, with white throat, very fine.

Bridal Wreath—A free flowering variety, producing trusses of snow-white flowers in great abundance.

Coral Queen—(Syn. Mrs. Green.)—Soft salmon coloured flowers of great substance, robust habit.

Countess Hopetoun (F.C.C.)—Rosy salmon, changing with age to flesh pink; blooms large and of great substance. **1s 6d**

Dazzler—A good vigorous variety, producing fine trusses of scarlet flowers.

Duchess of York—Deep blush pink, shading to a tinge of heliotrope.

Flavescens—Pale yellow, good in early Spring and late Autumn.

Flavescens, fl. pl.—Double yellow.

Hogarthi flora plena—A double variety of Hogarthi, the best double Bouvardia.

Humboldtii corymbiflora—Producing clusters of large snow-white flowers of unusual length; highly scented.

Jacquiniflora—Bright scarlet, hardy.

King of Scarlets (F.C.C.)—Immense blooms of deep scarlet, freely produced; vigorous grower. **1s 6d**

Laura—Salmon rose, single, a fine variety and very distinct colour.

Mabel Porter—Bright brick red, short tube, large petals; dwarf grower, free and early flowerer. **1s 6d**

Maiden's Blush—Bright blush pink, single, very free flowering.

Miss Ida Cheeseman—A very distinct variety, with large flowers of a pale delicate pink colour, the tube and reverse of petals being of a deeper shade; the plant is compact and robust, a very free bloomer, and is very sweetly perfumed. **1s 6d**

Mrs. G. H. Kerslake—Pure waxy white, very large.

Mrs. McCulloch—A very beautiful Bouvardia, producing immense trusses of large flowers of a reddish salmon colour. **1s 6d**

President Cleveland—Intense dark scarlet, single, a profuse bloomer.

President Garfield—Delicate pink, double, a fine variety.

Priory Beauty—Pale satin rose, single, a splendid variety.

Umbellata Carnea—Pale flesh colour to rosy blush, single, free bloomer.

Van Houtti—Rich crimson.

Vreelandi—Pure white, sometimes tinged delicate pink; and robust.

Recommend our establishment to your friends.

CAMELLIAS

THE Camellia is perhaps the most popular flowering shrub in cultivation, its gorgeous flowers and extended blooming season rendering it most desirable for garden decoration. A little care is required to secure success in planting. The soil should be in good condition, and shelter afforded for three months after planting. We only include those varieties which we can safely recommend. A large number in addition to those catalogued can be supplied if required.

1s 6d each, except otherwise priced.

- Alba plena**—Double white, fine ; 2s 6d.
Angelo Cocchi—White, striped rose.
Archduchess Augusta—Red, white stripes.
Aspasia—White, with pink spots.
Astarte—Pure white, fine ; 2s.
Augusta superba—Soft pink, finely cupped.
Bonomiana—White, carnation-tipped ; 2s.
Candidissima—White, fine form ; 2s.
Chandleri—Carnation striped.
C. M. Hovey—Bright crimson, splendid variety.
Commandatore Betti—Rich rose, good form.
Comtesse de Callina—Pure white, 2s.
 „ „ **Hainault**—Crimson, good shape.
 „ „ **Tozzoni**—Pale rose, margined with white.
Dryade—Rose, fine form.
Fimbriata alba—Splendid white, fringed ; 2s. 6d.
Harriett Beecher Sheather—Rosy salmon, perfect shape, a splendid flower.

Larger plants at proportionate advance.

- Hellenor**—Large, carnation striped.
Henry Favre—Salmon rose, fine shape.
Isabella—Pure white, late bloomer ; 2s.
Jubilee—Flesh, rose spots, free bloomer and hardy.
La Pace—White, shaded rose, striped.
Lady St. Clair—Rosy pink, perfect.
Lavinia Maggi—White, blotched crimson.
Lefevreana—Rich rose, large and perfect shape.
Mdme. Masson—Pure white, full ; 2s.
Mrs. Bell—Pure white, medium size, perfect shape ; 2s.
Pauline Maggi—Pure white, fine ; 2s.
Prince Frederick William—Superb rich rose.
Refais—Carmine red, perfect shape.
Roma Risorta—Soft rose, variegated with crimson.
Rose de la Reine—Soft rose, perfect shape.
Sarah Frost—Bright red, splendid.
Tabbs—Crimson, marbled and blotched with white.
Virginia Franco—Rose, white margin.
Wrighti—Rich crimson, magnificent.

CANNAS

THIS is a decorative plant of great beauty, quite hardy, nearly always in flower, magnificent in foliage like the leaves of the banana ; not particular as to soil or situation, a very ornamental plant apart altogether from its surpassingly lovely flowers.

9d each ; 6s per dozen.

- Africa**—Purple bronzy foliage, large flowered, golden yellow and orange ; splendid.
Alemannia—This variety produces the largest flowers which have been obtained as yet in the way of Cannas. The outer petals are scarlet, with a very broad gold-yellow border. The inside of the blooms is scarlet and dark red.
Austria—Flowers very large and compact, of a canary-yellow colour, with silvery hue, inside slightly dotted with brown.
Borussia—Flowers large, of a shining canary-yellow, with a golden yellow hue, and small fiery red spots, leaves broad and bright green, of medium height.
Burbank—Deep green foliage. Large flowers, light yellow, inner petals deep yellow, spotted with bronze.
Comte de Bouchard—Yellow, spotted red.
Duchess of Marlborough—Rose pink, large bunches of drooping flowers ; very effective.
Duke of Marlborough—Flowers deep rich crimson maroon, with a velvety appearance ; very rich colour.
Ehemanni—A lovely sort, with leaves narrowly striped yellow and green.
Italia—Spikes gigantic, about sixteen inches long, with a number of flowers, which are very large, with petals measuring about four to five inches, of scarlet colour, with a broad yellow border.
Lecroy—Crimson, with narrow band of deep yellow ; very fine.
Madame Crozy—The flowers are of a bright orange-scarlet colour, margined with a well-defined yellow edge ; of large size. The foliage is of light green.
Mt. Blanc—Creamy white, free flowering (new sort), splendid.
Oceanus—Bright green leaves, very large ; panicles yellow ; red spotted interior, petals almost quite red.
Pandora—Lanceolate-purple leaves, with a metallic hue and dark green stripes. Very large spike ; enormous flowers of a glowing fire red, dark red outside.
Partenope—Pointed sea-green leaves ; flowers vivid dark orange, difficult to define, and not previously met with in Cannas.
Queen Charlotte—Bright scarlet, edged with gold ; long massive spikes produced on stout stems, leaves dark glaucous green, plant of sturdy habit ; a really splendid variety.
Roma—Foliage dark green, with fine large flowers, dark orange, bordered with golden yellow ; very fine.

When in doubt what to order leave selection to us.

Carnation Novelties

1s 6d each ; 12s per dozen. (All non-splitters.)

Anona—Is, without doubt, the best white ground Picotee. Beautiful petals, with heavy edge of crimson. A perfect flower. Premier, and winner of best 6, W.P. Class, Carnation Show, N.S.W., 1904.

Carlisle—Red ground, striped and flaked black, exquisite flower, should become a favourite.

Coralie—Extra large blooms of a coral red colour, good shape, free-flowering, exquisite.

Dossie—The best pink and purple Bizarre extant, will always be on top; the bars of pink and purple well defined on pure white ground. Premier, and winner of Single Bloom Class, Carnation Show.

Endymion—Slate ground, striped maroon, unique and pretty.

Goldsmith (English)—This is one of the best yellow ground Picotees we have seen, purple edge, a most noble and pretty flower.

Harwood—One of the most lovely rose selfs in the market. Fine form and habit.

Ida—A grand sovereign yellow ground fancy, edged and marked deep plum; a very rich combination; beautiful form.

James Grieve (Douglas)—A beautiful red and white flake, fine large smooth petal, perfect in markings, and grand snow flake.

Jonquil—Extra large canary-yellow self, strong grower.

Kenmore—Dark red ground suffused with buff, fine form and free blooming, a beautiful flower.

Marge—A glorious deep yellow Picotee, with medium edge of rose, exquisite form, and excellent in every way. Premier, and winner of 6, Y.P. Class, Carnation Show, 1904.

Marie—One of the most beautiful yellow grand fancies in existence, form lovely, golden yellow; heavily edged, and marked deep maroon. Premier, yellow ground, Carnation Show, 1904.

Millie—White ground, edged and laced scarlet. A very refined flower. We can recommend this.

Tamworth—A purple flake, of fine form and large size, beautifully marked. Premier, flake, Carnation Show, 1903; and Champion, Neutral Bay Show, 1904.

Tempe—Rose ground, striped purple, exquisite form, a lovely carnation.

Wild Swan (Smith)—A beautiful snowy-white carnation, of grand form.

Wilfred Jones—This is, without doubt, a most perfect carnation, the colour is rose, streaked and splashed deep pink, large and excellent form, strong grower, very distinct.

CARNATIONS

GENERAL LIST.

In order to improve our General List, we have this year left out many previously catalogued so as to introduce some of the best non-splitting sorts. We can, however, supply many of the sorts we usually listed. Our stock this season comprises a large quantity of strong, clean and healthy plants, hard to excel.

1s each ; 9s per dozen.

Adonis—Sulphur yellow, pencilled scarlet, splendid bloom.

Amita—Yellow ground, fancy, with maroon markings; excellent form and colour.

Armidale—Purple flake, smooth edge, fine form.

Artemis—Scarlet, handsomely flaked and streaked lavender; the flowers of fine form and large size; a distinct and very attractive "fancy." Fancy First and Premier Bloom at the N.S.W. Carnation and Picotee Society.

Atalanta—Dark buff, striped bright coral, shaded rosy lake.

Brodick—Yellow ground, fancy; petals admirable; beautifully flaked and marked with clear rosy red.

Cinnamon—A pure Cinnamon self, large; grand form and smooth petal.

Cobar—Large size and good form, coppery, suffused with magenta.

Colo—White ground Picotee, heavy purple edge. Received premier honours at N.S.W. Carnation Show.

Como—Rose flake, exhibited at N.S.W. Carnation Show, 1903; was much admired; fine.

Water thoroughly; sprinklings often do more harm than good.

CARNATIONS—CONTINUED.

- Daimio**—Large, splendid shape, bluish white ground, broadly flaked with bright scarlet and cardinal.
- Dandy**—A beautiful Carnation, of true form, pencilled and picoteed with heliotrope on a creamy white ground; a grand Show bloom.
- David Scott**—Dark scarlet, shaded maroon, large, full, free flowering.
- Duchess of Fife**—A beautiful self, light coral, changing to pale flesh; a splendid flower.
- Edith Harries**—Deep yellow, finely striped and pencilled with bright rose; first-class.
- Ensign**—Bright terra cotta red, finely shaped, vigorous grower.
- Fascinate**—A beautiful white and red flake, of good form; a show Carnation.
- Flinders**—Velvety crimson, good form and substance.
- Florrie Henwood**—Clear yellow ground Picotee, edge marked rose.
- H. A. Wood**—Pearly white ground, flaked and pencilled violet crimson; a great exhibition flower.
- Isabella Henderson**—Pure silky white, large and full.
- Jim Curry**—Salmon ground and red, strong grower.
- Jubilee**—Flowers very large and double, colour bright rosy pink.
- Kingsley**—Yellow ground Picotee, heavily edged scarlet, very striking and handsome flower.
- Lady Tarleton**—A superb Carnation, creamy white ground, pencilled chocolate, excellent form.
- Lurline**—Pure white ground, edges striped and pencilled dark claret, very distinct.
- Lustre**—Dark crimson, with a metallic flake on each petal, very strong, robust grower.
- Magna alba**—Pure white, large and fine, habit vigorous.
- Mattie**—Pure white ground, flaked and striped with purple.
- Meteor**—Brilliant scarlet, large and good shape.
- Miss A. Campbell**—A beautiful yellow self; the queen of this popular colour; a capital grower.
- Miss Joliffe**—Soft pink, dwarf habit, free flowering, fine.
- Miss Vera Morris**—White ground, distinctly spotted lilac, very beautiful.
- Model**—Pure lustrous white, edged deep red, a splendid flower.
- Mrs. Davey**—White ground, edged and striped purplish rose, large.
- Mrs. Eric Hambro**—Purest white, the most perfect form.
- Mrs. Freeman**—White ground Picotee, light edged purple, a very charming flower, excellent form; will not burst.
- Mrs. Harby Dixon**—Carmine rose, extra large (non-splitter).
- Mrs. Hemsley**—Vermilion flaked brown, fine form (non-splitter).
- Mrs. H. Gazzard**—A beautiful bright pink self, large flower, very distinct.
- Mrs. Shaw**—A fine yellow ground, laced scarlet, clove-scented, one of the best (non-splitter).
- Muleteer**—Scarlet ground, lavender stripes, raised by Martin Smith, England, winner of premier honours and other prizes.
- Neville**—White ground Picotee, light edge red, a beautiful flower.
- Newhaven**—Very large, rich crimson, base of petals dark steel blue.
- Oroya**—A grand scarlet flake, flowers large and of excellent form, first-class.
- Piedmont**—A large rich apricot self, the only Perpetual of this colour, grand, dwarf, bushy grower.
- Pride of Penshurst**—Flowers are of good size, capital form, and of a deep clear yellow.
- Princess Alice**—Pure white, striped rose, perfect shape, first-class.
- Princess Dagmar**—A handsome Carnation, white ground, pencilled and picoteed with light shades of carmine.
- Ravenswood Pink**—Coral pink, perfect form.
- Reverie**—Rose ground, flaked maroon, fine shape (non-splitter).
- Richmond**—Dark red, spotted and pencilled chocolate, very fine.
- Risdon**—A pure white, margined with a very distinct wire of rosy salmon. A charming flower, free bloomer; distinct.
- Rosa**—A rare Carnation, perfect in form and colour, light salmon pink.
- Royal Purple** (*perpetual*)—Purple self; grand form, blooms in abundance.
- Royal Sovereign**—Bright golden yellow, faintly picoteed with heliotrope.
- Sadek**—Dark rose of admirable form and charming colour; habit vigorous and flowers borne erect.
- Schneewitchen**—White ground, lightly pencilled lilac, a beautiful clear flower.
- Stanley Gentle**—A large sized flower, of good form, unique, brownish-red, flaked dark prune, vigorous.
- Stanton**—French white, blotched and streaked two shades of pink, very perpetual, large, excellent.
- Strathearn**—Scarlet, handsome flower.
- Terrigal** (*perpetual*)—Pearly-white ground, ruby markings; very refined flower.
- Thos. Hill**—Dark velvety crimson, large, full, well-formed flower; vigorous grower.
- Tottie**—Lovely large flowering sort, colour light pink, striped and mottled deep pink, clove-scented, one of the best.
- T. W. Girdlestone**—Bright buff ground, heavily edged and flaked vermilion; very distinct; large, excellent form and habit; first-class.
- Verona**—Flesh, a lovely flower of exquisite form (non-splitter).
- Vita**—Flowers very large, fine clear cerise scarlet, beautifully fringed.
- Wansbeck**—A good flower, orange ground suffused with vermilion, perfect calyx.
- White Champion**—The best white Perpetual raised, large, extra vigorous.
- William King**—Dark glossy claret self, excellent form.
- Wm. Stephen**—A lovely flower, bright orange, edged and blotched reddish brown (non-splitter).
- W. R. Deane**—Pink, mottled and striped chocolate, strongly scented, very distinct.
- Zouave**—Red mottled and striped light rose, free.

Par-oidium is the best dressing for Mildew.

Chrysanthemums

THE following lists will be found to contain varieties of sterling merit. To grow Chrysanthemums successfully the ground should be deeply dug or trenched and well manured, then plant out young healthy plants, and as they grow pinch back the young shoots during the summer till the second or third week in January, when, if properly managed, they will be about eighteen inches high; they should then be allowed to grow, only thinning out weakly shoots and superfluous flower buds. The plants should be nicely regulated and shaped by tying them out neatly to stakes, and water once a week with liquid manure; the result will amply repay the trouble. We keep a supply of stakes of all sizes suitable for Chrysanthemums.

READY FROM AUGUST TO DECEMBER.

1s each; 9s per dozen.

Our selection, 6s per dozen for cash with order.

A. J. Balfour—Quite a novel colour, muslin rose-pink, large flowers, good habits, very attractive.

Alfriston (Ref.)—Colour, a very deep maroon red, reverse of petals gold; handsome variety on account of the inner petals showing gold, outer petals deep rich maroon red.

Australian Gold—Canary-yellow, fine exhibition bloom.

Beatrice May—Pure white, flushed lilac; extra-sized flower, of first quality, easy grower.

Beauty of Sussex—Beautiful deep rose, with a silvery reverse; fine show flower.

Bessie Godfrey (Godfrey)—Pale yellow, similar in form to Madame Andre; early.

Buff Globe—Deep buff, similar in all except colour to "Good Gracious."

Calvat's Sun—Canary-yellow; one of the best.

Directeur Liebert—Silvery pink, large, handsome and striking bloom.

Duchess of York—Delicate light yellow, very graceful.

Duke of York—Purple amaranth, reverse silvery; good exhibition bloom.

Duke of Wellington—Salmon buff outside, inside of petals a deeper shade of salmon.

Edwin Molyneux—Rich maroon-red, gold reverse; one of the best.

Flora—White, flushed with lilac, sometimes edged with lilac; an incurved variety.

General Hutton—A fine large flower of a bright yellow; each petal is margined with chocolate brown, full to the centre.

G. H. Kerslake, Jun. (Jap.)—Pearly white, a most handsome flower. Splendid for exhibition.

Godfrey's Pride—Very large and distinct; of a reddish carmine-crimson colour.

Spray freely to keep down insect pests.

CHRYSANTHEMUMS—CONTINUED.

Good Gracious—Delicate pink, good exhibition sort.

Graphic—Rosy-mauve and silvery white.

Henry Barnes—Deep crimson maroon, very large and good keeper; perfectly full, tall grower.

In Memoriam—Rich chestnut, striped gold, extra fine.

J. H. Doyle (Pockett)—Terra cotta, large full flower. Winner of Gold Medal at Melbourne, 1903.

John Pockett—Indian red and old gold; fine reliable variety.

Joseph Brookes—Orange and crimson, long drooping petals; a fine flower.

Joseph Chamberlain—Bright crimson, gold reverse; seedling from E. Molyneaux.

J. R. Upton—The largest and best of its class in cultivation; bright golden yellow.

Lady Mary Lygon—White; a magnificent flower.

Leila Filkins—Soft pale pink, drooping or reflexed type, and splendid constitution; will make a good exhibition variety.

Lord Alverston—Deepest crimson; will come on any bud. This is also one of the best varieties ever grown for garden decoration.

Lord Salisbury—Yellow, suffused with crimson; a magnificent flower, with long drooping florets, eight inches long.

Marcella—Deep red, golden reverse.

Master H. Tucker (Jap.)—Colour rich bronze flushed with red; good all round variety.

Md. Calvat—White, very long petals, dwarf habit, very good.

Mdlle. Therese Rey—A most lovely pure ivory-white of grand proportions; easy grower. First-class certificate.

M. B. Verlot—Rosy pink, shading to light violet.

Millicent Richardson—Colour, purple claret, silvery reverse, very handsome.

Miss Baden Powell—Colour, a beautiful clear golden yellow, slightly shaded red.

Miss Dorothy Shea—Terra cotta, large, fine form.

Miss Elsie Teichmann—Pearly white, of good substance and dwarf habit.

Miss Ethel Addison—Violet on white ground, silvery reverse, large.

Miss Lucy Evans—Good exhibition flower, of Australian origin.

Miss Maud Jeffries (Bunning & Sons)—A beautiful large incurved variety of the purest white. This variety was awarded first prize at the N.C.S.

M. Panckoucke—Soft yellow, refined; fine for exhibition.

Mr. Hugh Crawford—Colour brilliant golden yellow, with bronzy yellow reverse.

Mr. T. Carrington—Carmine and rose; good exhibition variety.

Mr. F. S. Vallis—Rich bright yellow; one of the largest and best-formed flowers in commerce.

Mrs. Cotesworth Bond—Soft pink, shaded white.

Mrs. C. Herman Payne—Rosy blush, large, good form.

Mrs. Cumming (Bunning & Sons)—Deep claret, light silvery reverse, good centre. This variety was shown at the Exhibition and Royal Horticultural Society's Show.

Mrs. H. Cannell—Pure white, petals immense, which incurve; one of the finest for purity of colour, breadth of petal, size and bold outline.

Mrs. S. Purchase—Silvery lilac, fine form, good habit.

Mrs. Upton—Rosy lilac, good petal; fine for exhibition.

Mrs. W. B. Fowler (Jap.)—Incurved, light pink, fine shape, large blooms.

Mrs. W. D. Darcy (Jap.)—Rosy cerise, large flowering, extra good.

Mrs. W. Duckham (Pockett)—Deep golden yellow; many of the flowers show red lines on the edge of the florets. Same type as Nellie Pockett.

N.C.S. Jubilee—Pale mauve, very like "Louise," but a much better flower.

Oceana—Rich golden yellow; one of the best.

Old Gold—A beautiful shade of old gold colour, large flower and good form; quite distinct.

Papa Veillard—Carmine and rose, very good.

Paul Oudot—Colour a transparent maize tint, lightly lined with clear carmine.

Peter Kay—Good light yellow, large size.

Philipp Mann—Charming shade of rosy purple, much in the way of a highly-coloured Commandant Blusset.

Phæbus—Good flower, clear yellow colour.

President Armand (Jap.)—Deep crimson red, golden reverse.

Pride of Madford—Rich rosy amaranth, reversed silver.

Purple Emperor—Rich purple, very free.

Queen Alexandra—Rosy salmon buff, a very distinct shade; large flower and good grower.

Robert Laird—One of the best pure white Japs in cultivation.

Robert Powell—Reddish chestnut, yellow reverse, fine shape.

Robert Williams—Rich dark crimson and gold; first class.

Simplicity—Pure white, very long drooping florets.

Sir E. T. Smith—Golden yellow, extra good.

Sir H. H. Kitchener—Terra cotta, one of the best exhibition sorts.

S. T. Wright—This is the largest crimson we have, a shade darker than E. Molyneaux, and very full; it requires very little feeding, and when intended for exhibition, rather late buds should be selected. Keep the flowers dry, and it will retain its colour and keep longer than any other variety we know of this colour.

Sunstone—Ochre-yellow; a beautiful exhibition sort.

T. B. Haywood—A capital white, massive and very free.

Triomphante de Ch. Molin—Violet, a good flower.

Western King—Massive flower, finest pure white in existence.

William Duckham (Wells)—One of the finest Japanese incurved ever raised, colour pale mauve. Awarded Medal at Edinburgh and Silver Cup at New York for best variety.

CLEMATIS

(Or VIRGIN BOWER).

Countess of Onslow

(First-class Certificate, R.H.S.).

A bright violet-purple, with a broad band of scarlet down the centre of each petal; it is of open, bell-shape form, with four to six petals to each flower; very free flowering, quite hardy, and a good climber; the flowers are thick in substance, and will be found very useful for decorative purposes, as when cut will keep fresh in water for several days.

Duchess of Albany

(Award of Merit, R.H.S.).

A beautiful bright pink, deeper down the centre, softening down to lilac-pink round the margin; campanulate in shape, quite hardy, free flowering, and a vigorous grower; useful for cutting.

Duchess of York

(Award of Merit, R.H.S.).

A delicate and very pleasing shade of pale blush pink, with a deeper tinge down the centre of each petal, of campanulate form, with four to six petals to each bloom; it is quite hardy, free flowering, and a good climber, useful for cutting.

Jackmani superba.

2s each; the set of three for 5s.

GENERAL LIST.

All strong plants.

1s 6d each; 15s per doz.

Alexandra—Pale reddish violet.

Beauty of Worcester—Blue violet.

Duchess of Edinburgh—Double white (best).

Fair Rosamond—Blush white, with an indistinct wine red bar.

Jackmani—Deep violet, blue.

„ **superba**—Very dark purple, an improvement on *Jackmani*.

Lord Derby—Anthers reddish purple, with white filaments.

Lord Neville—Dark plum.

Lucy Lemoine—Very fine, double white.

Madame E. Andre—Bright red, of a velvety colour.

Madame Grange—Crimson violet, tinted with red in the centre, most distinct.

Magnifica—Reddish purple, with red bars.

Marie Lefebvre—Mauve, deep purple bar.

Mrs. George Jackman—Satiny white, with creamy bar.

Prince of Wales—Deep puce purple.

Princess of Wales.

Robert Hanbury.

Rubella—Rich claret purple.

Star of India—Violet purple, with rosy purple band.

Thomas Tennant—Pure white, very large flowers.

Tunbridgensis—Deep bluish mauve.

Vesta—White, with a creamy tinge over centre bar.

COLEUS

A most attractive and easily cultivated tribe of plants, with beautiful and varied foliage; suitable for pot culture, and cannot be surpassed for window or verandah culture.

Very choice selection 6s per dozen.

Nothing can exceed the beauty of Climbing Clematis.

Dahlias

THE gorgeous flowers of the Dahlia, combined with its long blooming season, extending over a period of fully six months, render it one of the most desirable plants for beautifying and enriching a garden. The flowers are also invaluable for bouquets and table decoration. We only catalogue a few select varieties in each class, but we can supply much larger collections if desired. Plant from July to December.

New Cactus Dahlias.

2s each,
except where otherwise shown.

Only green plants of these can be supplied in Spring, except Mont Blanc, of which dry bulbs are available.

CORONATION—The best of the new type of Pomponé-Cactus; colour, glowing vermillion-scarlet.

EDITH GROOM—This is a pure white variety, with refined points; it is a decided acquisition. It possesses all the points requisite in a true Cactus Dahlia; the petals are long, and the blooms are most elegantly formed. It is very constant, holds its head erect, well above the foliage. 3s 6d each.

FLORENCE M. STREDWICK—This pure white variety is recommended with every confidence. Awarded Certificates by the N.D.S. and R.H.S.

GEORGE GORDON—The colour is a pleasing yellow, with orange-bronze shading. It is a magnificent exhibition variety, and has been awarded by the N.D.S., R.H.S. and Brighton.

HARBOUR LIGHT—This startling seedling Cactus created a sensation at all the exhibitions shown at last autumn. The habit is all that the most fastidious can desire. The blooms, which are vivid orange-red, overlaid at the tips of the petals with flame colour, are boldly produced on very stiff foot-stalks, and stand erect some eight or nine inches above the foliage. 3s 6d ea.

HELEN STEPHENS—The colour is a pure soft yellow, with incurved, claw-like florets; it is an excellent addition to the yellow varieties, for its centre and outline are all that can be wanted. It is predicted that this will become the standard Yellow variety, gaining in popularity the more it becomes known. 3s 6d each.

MRS. H. L. BROUSSON—Finest incurved form, and invariably of good depth. The colour is best described as a delicate salmon on pale yellow ground. The flower stems are unusually stiff and long. Awarded F.C.C., N.D.S. and L.D.U.; and A.M., R.H.S.

MONT BLANC—Pure white, very large flowers, petals long and beautifully clawed, splendid form and habit. The best white Cactus Dahlia. 3s 6d each.

PEARL—A pretty shade of rich rose-pink, extreme tips of the florets bluish-white. The combination of the two tints give the flower a very distinct and pleasing character. Awarded many prizes.

PEACE—Pure ivory-white Pomponé-Cactus, similar in form to "Coronation."

RUFUS—Blooms very large and carried on long stems, colour glowing vermillion-scarlet.

SYBIL GREEN—Another white seedling Cactus Dahlia; ivory-white, a very pleasing colour, and one that is wanted in every collection. Large build, with the longest petals of any white kind and the best in regularity of formation of bloom. It is a surprisingly effective variety in the garden, for the footstalks are so long that every bloom is thrown well above the foliage and shown off to advantage. 3s 6d each.

Should soil be dry, water a day or two before planting.

GENERAL COLLECTION OF CACTUS DAHLIAS.

1s each; 9s per doz. (except where otherwise priced).

- Albion**—Pure white, tinted cream in extreme centre; florets very long and straight, stems stiff.
- Alpha**—A fancy Cactus, white ground, speckled and striped with purple, crimson and lilac.
- Britannia**—Delicate shade of soft salmon, pink petals, long and beautifully arranged; an unique flower.
- Capstan**—Soft brick red, tinted apricot.
- C. N. Richardson**—Deep yellow, outer petals shaded rosy salmon; large and refined form.
- Clara G. Stredwick**—Clear bright salmon, shading to yellow; perfect blooms, narrow petals.
- Columbia**—Bright vermilion; the centre and tip of each floret pure white.
- Corallina**—Indian red.
- Countess of Lonsdale**—An exquisite rich shade of salmon apricot at the base of petals, carmine pink towards the tips.
- Ella**—Rich apricot, heavily shaded and suffused vermilion, long narrow petals; a very large, refined flower.
- Earl of Pembroke**—Bright plum colour, long twisted petals; very distinct.
- Etna**—Lilac and yellow.
- Florrie Tranter**—Dull red.
- F. H. Chapman**—Yellow, overlaid with deep orange; a flower of fine character; long, narrow, incurved petals.
- Gabriel**—Ground colour, soft velvety crimson; upper half of each petal is pure snow-white.
- Galliard**—Clear, bright red, very fine twisted petal, exquisitely formed flower, suggestive of a Catherine wheel.
- General Buller**—Rich velvety crimson, nearly black at the base, every floret having a white tip. **2s**
- H. F. Robertson**—Yellow, good form.
- H. J. Jones**—Primrose and pink.
- Innovation**—Base half of petals clear crimson, other half pure white; most effective.
- J. H. Jackson**—Darkest variety yet raised; colour brilliant crimson-maroon, almost black.
- J. Weir Fife**—Base of petals deep velvety crimson, other part plum. Fine, large, well-formed flower, very distinct.
- J. W. Wilkinson**—Deep, rosy crimson; strong grower.
- Khaki**—Glowing orange mingling with fawn and yellow.
- King Edward VII.**—Colour, beautiful bright cherry red shade; has the finest petals of any Cactus yet raised. **1s 6d**
- Laverstock Beauty**—Soft vermilion, long pointed petals; very fine variety indeed.
- Lord Roberts**—Pure white, with long, narrow quilled petals; finest exhibition form.
- Mabel Tulloch**—Clear rosy pink, beautiful colour; a most telling flower.
- Major Tuppenny**—Yellow centre shading to rosy orange.
- Mr. J. Harrison**—Crimson.
- Mr. Seagrave**—Purple-rose.
- Mrs. Carter Page**—Crimson, with yellow base, beautifully twisted.
- Mrs. E. Mawley**—Clear yellow, large, full and well formed flower, with long, narrow, slightly incurved petals; undoubtedly the finest yellow to date.
- Mrs. F. McQuade**—An exquisite variety, large, pure white; an exhibition variety of the first order; very fine incurving florets. **1s 6d**
- Mrs. James Bailey**—Ruby.
- Mrs. J. J. Crowe**—Clear yellow, petals extremely twisted and pointed, and tapering on long, stiff stalks; so narrow are the petals that it has been mistaken for a chrysanthemum.
- Mrs. Kerslake**—A soft salmon pink; true Cactus type.
- Mrs. Sanders**—Pure deep yellow, very free and good form.

- Mrs. Winstanley**—Yellow disc, gradually shading to soft scarlet; a glorious and distinct flower of very fine form and extra large size; undoubtedly one of the very finest Dahlias ever offered.
- Night**—Intense velvety maroon, nearly black, splendidly formed flower.
- Ophir**—A soft golden apricot colour, slightly paler in the centre.
- Prince of Orange**—Apricot, orange, and salmon, attractive decorative variety. **1s 6d**
- Princess**—Rose-pink.
- Progenitor**—Intense, rich, scarlet lake: large flower of splendid form and depth, carried high on long stiff stems, each petal spurred and bifurcated, giving the flower an extraordinary distinct and charming appearance.
- Queen Alexandra**—Ground colour a very distinct yellow, tipped red; a lovely contrast in colours. **1s 6d**
- Ranji**—Nearly black, quick grower, free.
- Richard Dean**—Vermilion-scarlet; distinct white tips to petals.
- Shamrock**—Orange and scarlet.
- Starfish**—Clear scarlet, long pointed petals.
- Sunrise**—Soft amber.
- The Clown**—Brick red, tipped white.
- The King**—Velvety crimson.
- Uncle Tom**—Deep crimson maroon, almost black; long pointed petals.
- Up-to-date**—Soft carmine, long, narrow petals; very refined flower.
- Wm. Guthbertson**—Rich crimson, later passing to carmine at tips.
- Wm. Everett**—Bright scarlet, medium size, substantial and well formed flowers; extra. **1s 6d**

SHOW, FANCY, and POMPONE DAHLIAS.

1s each; 9s per dozen.

Large and very double flowers. This is the class from which the best exhibition flowers are selected.

- Annie Gibbons**—Primrose, good form.
- Candeur**—Fire-red.
- Eclipse**—Red, very double.
- James Vick**—Deep crimson purple; splendid.
- Magpie**—White, striped maroon.
- Mrs. Carter**—Rich maroon, tipped white; exquisite form.
- Mrs. Gladstone**—Delicate blush; very fine.
- Mrs. Piggott**—Pure white, good.
- Prince of Denmark**—Dark maroon, shaded crimson.
- Rob Henderson**—Yellow.
- Yellow Boy**—Yellow, good form.

COLLARETTE DAHLIAS.

A NEW FORM. 1s 6d each.

Forerunners of quite a new race of Dahlias, absolutely distinct from any others hitherto in cultivation.

- Gallia**—Splashed crimson, on a cream ground, collarette sulphur yellow.
- La Fusee**—Petals painted and twisted like single Cactus Dahlia, garnet red, collarette fine and erect, the white shaded with reddish violet; elegant and original.
- President Viger**—Large circular flowers on stiff foot-stalks of reddish carmine colour, with a smaller collar of pure white florets; very distinct and effective.

TREE DAHLIA. 1s 6d each.

- Imperialis**—This highly attractive plant grows to a height of 6 or 8 feet and produces an abundance of single flowers; white tinted rose, invaluable for bouquets and table decorations.

You cannot garden successfully without shelter.

ERICA (Cape Heath)

THESE extremely beautiful plants may be grown in almost any good garden soil, but they prefer a good, moist, peaty or sandy soil, in a cool position and well sheltered. Several varieties will bloom the whole year round, and for this reason are most desirable for small gardens. Splendid bouquet flowers.

1s 6d each; 15s per dozen.

Autumnalis—Bright lively pink.
Bowieana—Pure white, hardy, always in flower.
Cavendishi—Yellow, very pretty.
Charsleyana—White, changing to blush colour.
Hybrida—Light red, one of the best.
Intermedia—Beautiful white.
Jubilee—A large flower of the Webleyana type, but much darker in colour.

Linnæoides—Purplish-rose, very pretty.
Mackinnoniana—This is one of the darkest coloured of the group, being of a purplish-rose colour.
Menziesia polifolia—Pink Irish heath.
Vulgaris—Purple, *Heather of Scotland*.
„ alba—White.
Webleyana—Pale lilac, pretty.
Wilmoreana—Pink and white, hardy.

FUCHSIAS

THE Fuchsia deservedly enjoys a very high reputation. It cannot be misplaced. In the open garden, the conservatory, bush and green house, verandah or in the window, it is alike at home. For table decoration it is unsurpassed. 9d each; 6s doz.

Varieties marked **D** are double; **S** are single.

Aurora superba—S. Tube and sepals rich salmon, corolla orange-scarlet, fine habit, free bloomer.
Avalanche (Henderson's)—D. Tube and sepals crimson, purple corolla.
Beacon—S. Tube and sepals crimson, purple corolla.
Beauty of Exeter—S. A novelty in colour, being a mixture of light and crimson, robust and free in habit.
Black Prince—S. Tube and sepals bright waxy carmine colour, sepals large and broad.
Carter's Meteor—D. Tube and sepals light crimson, corolla purple; the young leaves are beautifully coloured, crimson and golden, unique.
Countess of Hopetoun—D. Very large corolla, pure white, dark red sepals, extra fine
Corymbiflora—Large leaves, red flowers, borne in clusters.
Dr. Dollinger—D. Large double purple, an old favourite.
Duchess of Edinburgh—D. Largest double white in cultivation.
Earl of Beaconsfield—S. Sepals bright rosy carmine, corolla deep carmine, very long tube.
Edmond About—D. White corolla, striped rose, reflexed vermilion sepals.
Flora—D. Rosy crimson, sepals reflexed, purple corolla, flaked with rosy carmine.
Frau Emma Topfer—D. Tube and sepals rosy coral, corolla rosy blush.
Fulgens—S. A distinct herbaceous species, with very large leaves; the flowers, which are produced in bunches, are very long and of a bright vermilion colour, very distinct.
Hoch—D. Sepals rose, reflexed corolla, rosy lilac.
Jean d' Arc—D. Tube and petals light crimson, corolla white, rosy at base.

Jubilee—D. Quite a new colour in Fuchsias, very double, light blue.

Jumna—D. Bright crimson sepals, enormous double purple corolla, marked rosy crimson at the base.

Kirki—A climbing species from New Zealand, with small round leaves; during winter the plant is covered with bright crimson berries; a graceful plant.

La France—D. Sepals recurved, scarlet corolla, very large and bright, cobalt blue.

Miss Lizzie Vidler—D. Rich crimson sepals, reflexed and large flowers, rich bright violet mauve.

Molesworth—D. Tube and sepals bright carmine, large and full, pure white corolla.

Mrs. Marshall—S. Tube and sepals white, corolla pink.

Ovid—D. Short coral-red tube and sepals, the latter broad and well reflexed, immense white corolla, shaded magenta, crimson at base.

Phenomenal—D. Short tube and reflexed sepals, rich reddish crimson, enormous corolla, azure violet flaked with red; one of the largest double Fuchsias.

Rose of Castille—S. White sepals, violet corolla.

Splendens—A hybrid variety, producing rich crimson flowers, with the ends of the sepals light green.

Storm King—D. Sepals rosy coral, corolla rosy blush.

Sunray—S. The leaves are rich bright crimson, white and bronzy green, a beautifully variegated plant; 1s.

Viceroy of Canada—D. Large purple corolla, crimson sepals

Victor Hugo—D. Tube and sepals brilliant red, corolla blue, flaked crimson.

White Giant—D. Extra large, white.

In staking, tie firmly round stake and loosely round tree.

GLADIOLI

Our collection of these comprises over 90 varieties of the choicest Continental sorts, which we can guarantee is equal to any similar collection.

- Amalthee**—Pure white, large violet-red blotch, ground of the corolla velvety violet, the lower petals slightly tinted with lilac.
- *Amerique**—Compact, well-shaped spike, with large, well-expanded flowers, cinnabar-red, striped red-brown.
- Astarte**—Compact, finely-shaped spike of large well-expanded flowers, pale rosy-lilac streaked with rose, faint amaranth blotch.
- Baucis**—Handsome, compact spike, with large flowers of rose colour slightly tinged with salmon, blotch dark amaranth-red.
- Benvenuto**—Brilliant light orange-red, white blotch.
- Carnation**—Large, well-expanded flowers of a fleshy-white colour, profusely tinged at the edges with the richest carmine, the lower petals blotched purplish-carmine; fine, long, well-furnished spike.
- Chicago**—Compact spike of well-expanded flowers, very dark carmine-red, with a few almost black stripes, large white blotch and centrebands.
- *Chloe**—Beautiful spike, large, well-rounded flowers of a bright cherry red, with a large, distinct pure white blotch.
- *Commandant Marchand**—Compact spike, well-expanded and perfectly-shaped flowers of a velvety dark ruby colour.
- Conquete**—Large and fine flower, bright cherry-red with a conspicuous pure white blotch, upper petals striped with delicate rose.
- Crepuscule**—Splendid spike, with large, well-expanded flowers of lilac-rose slightly flushed with carmine, and with violet on the edges of the petals.
- Escarboucle**—Handsome, well-opened flowers of good substance, dark carmine-red verging to grenade, pure white band and blood-red blotch on lower petals.
- Fatma**—Very large flowers of ivory-white ground, profusely striped and suffused with bright rosy-salmon, violet blotch on creamy ground.
- *Festival**—Pretty, well-furnished spike of large salmon-scarlet flowers, bright centre.
- Fra Diavolo**—Long, compact spike of large bright orange-rose flowers, flushed violet-red at the edges of the sepals, large pale yellow blotch; fine variety.
- *Gazelle**—Long, compact spike of well-opened flowers, fresh rosy-lilac, slightly flamed with amaranth-red.
- *General du Barail**—Erect and steady spike of large carmine-red flowers, largely blotched pure white; very effective.
- Grandesse**—Very large, well-opened flower, petals fleshy-white, slightly suffused with fresh lilac, carmine blotch.
- *Grand Vainqueur**—Very tall spike, with large rose-coloured flowers, profusely flushed with carmine; handsome variety.
- Hercules**—Very large flowers, produced amply on a fine spike, brilliant velvety scarlet flamed and streaked with orange-red, violet blotch on mauve ground.
- *La Francaise**—Very large flowers of a soft pale lilac, with a pure white blotch; very handsome variety.

NO class of hardy flowers of the present day can equal the brilliancy and diversity of colour of this beautiful genus, comprising as they do almost every shade of white, pink, scarlet, violet, &c. They do exceedingly well in our climate, and their culture is very easy, merely requiring to have the soil well broken up and a liberal quantity of decayed manure forked in, planting the bulbs three inches deep. As cut flowers, too, they have much to recommend them, and will continue in all their brilliancy for ten days or a fortnight in water, developing every unopened bud.

General Collection, 7s 6d per dozen.

Those marked with a star, 10s 6d per dozen.

- Le Tintoret**—Fine cherry-rose flamed with carmine, carmine blotch on yellow-tinted ground.
- Liley**—Very large flowers, mottled with creamy-white and extremely bright soft rose, delicate shade.
- Madame Poiret**—Admirable spike, with large flowers of a coppery-rose colour, with a slight golden blotch.
- *Magnificus**—Very large flowers, round and open, cinnabar-red, fine white blotch edged violet; extra.
- Marechal Vaillant**—Very brilliant scarlet, with large pure white blotch.
- *Mascarade**—Very curious plant of dwarf habit; small or middle-sized flowers, pale fleshy-rose, profusely streaked with cherry-red; very effective.
- Michigan**—Tall and compact spike, with large flowers of bright cherry-red colour, white blotch.
- *Mirbel (de)**—Fine rose, slightly tinted with lilac-violet, striped and flamed with dark carmine.
- Mr. Jansen**—Large rosy-carmine flowers, edged and faintly streaked with violet-red; blotch cream-coloured.
- Neron**—Tall spike, rounded flowers of a beautiful dark crimson suffused with dark blood-red and violet.
- Nestor**—Light yellow, the lower petals darker, striped with red.
- *Osmanli**—Tall, well-furnished spike of dark orange-coloured flowers, profusely streaked and spotted pure white; decided contrast of colours.
- Pactole**—Beautiful yellow, slightly tinged with rose at the edges, blotch of a darker shade.
- *Perfection**—Pale fleshy-rose, streaked and banded at the edges with coppery-rose, striped violet on the two lower sepals; admirable colour, flowers very large.
- Professor Maxime Cornu**—Compact spike, large flowers of a fine, intense blood-red colour, streaked with deep vermillion.
- Proserpine**—Very large, well-expanded cherry-red flowers banded with slate colour; tall, well-arranged spike.
- Pyramide**—Handsome spike, large, well expanded flowers of the brightest and most delicate orange-rose.
- Reverend Berkeley**—Light rose, tinged with violet-carmine, feathered white blotch.
- *Rosalba**—Fine spike of pretty flowers of white ground, largely blotched with bright carmine; extra.
- *Sceptre de Flore**—Large flowers with white throat, brightening to the richest rose colour at the circumference of the petals, spotted carmine; lower petals blotched carmine and a pure white band.
- Suffren**—Flowers fresh, bright cherry rose, blotch carmine with violet centre stripe; very pretty.
- Thermidor**—Large salmon-red flowers, profusely flushed and edged with slate grey; very distinct.
- Tigridia**—Flowers salmon-yellow, very large and well open, capriciously flamed with rosy-carmine.
- Titania**—Beautiful tall spike, extra large flowers of creamy-salmon flamed cherry.
- Van Deal**—Flowers of a delicate salmon-rose at the centre, streaked with blood-red at the top of petals; very fresh colour.

Hedge Plants

NOTHING conduces more to the beauty of a homestead than appropriate Hedgerows, well kept. Hedge plants should be planted early in the season, so that they may be well established before Summer.

- African Box Thorn**—Per 1,000, **20s.**
Bougainvillea—Of sorts, in pots, **15s** dozen.
Cupressus—Several varieties, in pots, from **9s** dozen.

Thrift—Per 100, **10s.**
Violets—White and blue, per 100, **6s.**

Pæonia Officinalis

(Herbaceous Peonies)

1s 6d each; **15s** per dozen.

A handsome perennial flower,
blooming in early Summer.

- Alice Gorman**—Pink, central filamental petals tipped with buff.
Beauty of Nance—Pink petals forming three layers in different shades.
Bossuet—Rose, double tall flower.
Brilliant—Light pink, striped with crimson.
Clara Bisset—Pale rose, central filamental petals yellow.
Francois Ortegat—Crimson, central petals tipped with yellow.
Frau A. Weber—Rose, striped with crimson.
Helene—Rose, central filamental petals yellow.
Howard's Beauty—Carmine, central filamental petals yellow.

- Isabella Hiss**—Purplish red, yellow in central filamental petals.
Madonna—White, striped with greenish yellow and red.
M. Blanc—Pyramidal head, white.
Miss Baumann—Blush, yellow in central filamental petals.
Nemesis—Light pink.
Reine Alexandra—Light lilac, white.
Royal Star—Dark red with yellow filamental petals in centre.
Triomphe de Paris—Double crimson all through.

Also the Common Large Red so popular in England, **1s** each.

Water thoroughly; sprinklings often do more harm than good.

Pelargoniums.

Pelargoniums are of easy culture in our climate, either in pots or in the open border. No garden, however small, can fairly dispense with these old favourites.

SHOW AND REGAL PELARGONIUMS. 1s 6d each; 15s per dozen.

Beauty of Oxtou—Rich maroon, darkly blotched.

Captain Raikes—Fiery crimson, lower petals bright crimson.

Champion—Fine trusses of beautiful crimped flowers, lower petals crimson lake, upper petals maroon, with fiery crimson.

Conductor—Bright carmine, upper petals maroon blotched.

Decorator—Rosy crimson, all the petals spotted with dark maroon; very pretty.

Diplomatist—Rosy purple lower petals, maroon top, clear white eye, good habit.

Duchess of Bedford—Its blossoms are of the purest white, prettily fringed, with feathered

spot of delicate rose in the upper petals; dwarf habit.

Duchess of Edinburgh—Flowers white, purple blotch, beautifully fringed; large truss, very free; dwarf habit.

Duke of Albany—Deep rich crimson maroon, margined with rosy lake, light centre, petals beautifully undulated and fringed; a very fine flower.

Duke of York—Crimson, shaded with rosy purple, edged with white, and veined with maroon, light centre; fine large flower.

Edward Perkins—Very large flowers, brilliant orange-carmine, with blotches on the upper petals.

Emperor of Russia—An exceedingly distinct and showy variety, each petal having an equal cloud of dark maroon crimson, elegantly marked with a pure white belt; one of the best.

Fairy Queen—Pure white, upper petals delicate lilac; a most profuse bloomer; without exception the most lovely light-coloured Fancy Pelargonium that has come under our notice.

G. Shepherd—A magnificent flower of brilliant orange-crimson, large truss; one of the finest decorative varieties.

ZONALE GERANIUMS

(PELARGONIUMS).

These beautiful hardy plants have now been so improved they are sure to come to the front amongst flower growers once more. 1s each; 9s doz.

Albion—Single white, large.

Acquisition—Pure white, good habit, and cannot fail to prove a great acquisition. Double.

Capt. Flayelle—Reddish crimson, enormous flowers. Double.

Dream—Pale pink; lovely bloom. Single.

Esperance—White, mottled and striped scarlet, extra fine. Double.

Iseult—Salmon, richly shaded orange, two upper petals suffused with pink. Single.

James Kelway—Brilliant vivid scarlet, fine habit and size of flower. Single.

VARIEGATED FOLIAGE GERANIUMS

(PELARGONIUMS). 1s each; 9s per dozen.

Distinction—A novel variety, the green rich leaf disc being circumscribed by a narrow vandyke zone, and the margin similarly crimped with sharply notched outline.

Enchantress—Highly coloured vandyke zone, deep golden margin.

Happy Thought—Leaves green, yellow centre, flowers magenta.

Mrs. Pollock—Bronze-red zone, belted and edged with crimson and gold.

IVY-LEAVED GERANIUMS

(PELARGONIUMS).

9d each; 6s per dozen.

Abel Carriere—Soft magenta, feathered maroon, extra.

Beauty of Jersey—Vermilion, semi-double.

Dolly Varden—Crimson, shaded and violet, beautiful golden foliage.

Furstin I. Von Hohenzollern—Red magenta, distinct

Goldmine—Orange-scarlet, upper petals blotched dark maroon, large white eye, distinct.

Her Majesty—An extremely fine variety, producing immense trusses of large, well-shaped, pure white flowers, beautifully undulated and fringed, incomparable, one of the best.

Madame Thibaut—White, blotched and marbled with rose, upper petals marked with crimson maroon, large white centre, showy and free-flowering.

Marie Malet—Upper petals white, with a small crimson blotch, lower petals maroon, shaded with a white margin.

Miss Lily Cannell—A highly attractive flower, must become a general favourite; colour maroon and crimson.

Mons. Desmoulin—Deep rose, dark blotch, light throat and edges; large and free.

Mrs. Harrison—Very large, pink; white centre & margin.

Persimmon—Intense orange-scarlet, large and bold.

Prince of Wales—Bright vermilion, light centre and edges, upper petals light crimson and darkly blotched.

Purple Emperor—Fine, bold, open flowers, upper petals feathered and blotched maroon, distinct.

Queen Victoria—Flowers rich vermilion, all the petals broadly margined with pure white, and the upper ones blotched with maroon.

Robina—Salmon rose, pretty and distinct.

Rob Roy—A free, fine purple flower, rosy purple lower petals, top petals black, with purple edge, clear white eye.

Rose Queen—Blush pink, blotched maroon, red spot on lower petals.

Sister of Mercy—Upper petals dark maroon, lower petals crimson, white centre.

St. Visto—Bright scarlet, white throat, very floriferous.

Sultana—Lower petals rosy purple, top petals finely marked with black, narrow lilac margin, clear white centre.

Volonte Nationale—Flowers extra large and of good shape, each petal blotched with rosy-carmine, margined with a broad band of pure white, white throat, beautifully crimped.

Jewel—Small flower of a beautiful form, being like a rosebud, scarlet.

King of Denmark—Salmon pink. Double.

Kitty—Cherry red, with white eye, paler blotch in upper petal. Single.

Lady Frances Russel—Single rose, white eye, large.

Madame Carnot—Very large trusses of perfectly formed pure white flowers. Double.

Madame Landry—Deep salmon. Double.

Miss G. Ashworth—Pure white. Double.

Mrs. Keiler—Rose, with large white eye, dwarf and compact in growth.

Mme. Sallerai—Very dwarf and compact, of regular growth, and forming into well-formed tufts; never been known to flower.

Queen of Queens—A great improvement in this section, bushy habit, broad white margined leaf, deep green centre; good in all seasons.

Sophia Dumaesque—Habit vigorous and freely bunched, its golden leaf margins effectively marked by a scarlet inner zone, distinct.

Nothing can exceed the brilliancy of this beautiful class; they produce blooms in profusion, and can be trained at will, and convert an unsightly object into a thing of beauty.

Joan of Arc—White, shaded with lavender, exquisite.

La Rosiere—Satiny rose, lighter margin, perfect

Souvenir de Charles Turner—Rich rosy cerise, superb.

Vesta—Deep pink, rayed with purplish crimson.

Pentstemons

EXTREMELY valuable plants for the flower garden, producing an abundance of bright and brilliant flowers for a lengthened period. They will do almost anywhere.

9d each, 6s per dozen. Our selection, 5s per dozen.

A. J. Tymms—Rosy pink, white throat, veined purple, large spike.

Brilliant—Bright scarlet, clear white throat, fine spike.

Clara—White, bordered with purple.

G. H. Kerslake—Clear rosy lake, throat white, pencilled maroon; exceedingly large Gloxinia-like flower.

J. H. Horton—Purple, white throat, pencilled maroon, immense Gloxinia-like flower, fine spike.

Laura—Rosy lilac, white throat.

Oracle—Rosy salmon, white throat.

Sigvard Berle—Bright scarlet, white throat, pencilled carmine.

White Beauty—Ivory white, tinted rose.

Petunia, Double

GORGEOUS and profuse flowering plants, affording a grand display of blooms throughout the Summer. Our list comprises most of the best varieties, but we do not attempt to describe them, as the flowers vary so much, even on the same plant.

White, purple, crimson, striped, etc., and at least a dozen varieties of various blendings of colours. 9s per doz.

Phlox, Perennial

EXTREMELY hardy flowering plants, producing a profusion of beautiful flowers of various shades of colour.

9d each; 6s per doz.

Aurora—Coppery-salmon, purple centre.

Boule de Feu—Fiery crimson, dark eye.

Croix d'Honneur—Rosy-mauve, produced in large trusses.

Delicata—White, rosy-blue eye.

Esclarmonde—Deep lavender or heliotrope, base of petals white.

Etna—Orange-scarlet, deep maroon centre; one of the highest-coloured.

Eugene Danzanvilliers—Very light lilac, white eye.

Flambeau—Very bright orange-red, striped centre; large and fine.

Gideon—Salmon pink, dark eye.

Henry Martin—White, large rosy-pink eye; extra fine.

Iris—Blush-violet, distinct blue centre.

Jupiter—Rose, striped orange-scarlet, crimson eye.

Lonchamp—White, carmine eye.

Niphetos—Pure white.

Pluton—Dark purple, fine form.

Torpillieur—Bright magenta.

Weston—Dark pink, large flower, fine truss

SEASON 1906.

NOVELTY LIST OF ROSES

ENGLISH and . . .
CONTINENTAL NOVELTIES.

Anne Marie Soupert—H.T. Lake-red, very large, of splendid form and habit, with strong foot-stalks, long bud, and good foliage. A valuable addition to the high-coloured varieties of this class. 2s each.

Betty—H.T. This is one of the gems of the season; the colour is unique, being ruddy-gold, a coppery-rose, overspread with golden-yellow, the blooms are fairly full, and very large, the bud exceptionally long, growth very vigorous. It has been in flower the whole season. We without hesitancy predict Betty to become one of our most popular roses; strong plants. 3s 6d each.

Betty Berkeley—Tea. Bright red, verging on blood-red, a very intense colour, flowers medium size, full and well formed, a very distinct and beautiful variety. Can highly recommend it for button-hole or decorative work; growth robust. 1s 6d each.

All young Rose Trees should be pruned before planting.

NOVELTY LIST OF ROSES—CONTINUED.

Countess Cairns—H.T. A seedling from President and Caroline Testout. Flowers cerise-carmine, not full, but of large size, with handsome petals, and produced in great profusion. A most beautiful and attractive bedding and decorative variety; growth vigorous. **2s** each.

Climbing Papa Gontier—T. A strong climbing form of this well-known favourite rose, and a most welcome addition to our climbing roses. **1s 6d** each.

Glb. Mdm. de Watteville—T. This we consider one of the finest acquisitions of the year. The dwarf variety has always been a favourite since first introduced, and the climbing variety will be more so on account of its vigorous habit. **1s 6d**.

Countess of Derby—H.T. The blooms are large, perfectly symmetrical, with highly-pointed centre; colour: centre salmon; outer petals, rose, passing to flesh-peach, veined as the flower expands. Extra free flowering. A decidedly valuable addition for exhibition or garden decoration. **3s 6d** each.

Charles J. Grahame—H.T. Colour dazzling orange-crimson; the blooms are standing, large, and of splendid form, rarely is there a mis-shapen bloom, so that it is an ideal exhibition rose; its vigorous growth and large foliage, coupled with its unique colour, adds much to the attraction of this rose, supplying, as it does, what has hitherto been required in this most popular class. **3s 6d** each.

Dean Hole—H.T. A most distinct and excellent rose. It is a chaste and perfectly-formed flower of great beauty, the blooms are large, and of good substance, high centre, and fine elongated form; colour, silvery-carmine. **2s** each.

Dr. J. Campbell Hall—H.T. Colour: Coral-rose, suffused with white; blooms large and well formed, growth vigorous, free blooming. **2s** each.

Earl of Warwick—H.T. Blooms rich soft salmon-pink, shaded in the centre with vermilion, large and full, growth strong. A magnificent variety for exhibition or cut blooms. **2s** each.

Etoile de France—H.T. This is said to be the finest dark hybrid tea ever offered; colour velvety crimson, centre vivid cerise-red; growth very vigorous and robust constitution; very free flowering, fine upright habit, and good foliage, blooms large and pointed. For quantity and quality combined Etoile de France is the best red rose we have. It is Mdm. Abel Chateney in every way but colour. We can strongly recommend it. Strong plants. **2s 6d** each.

Florence Pemberton—H.T. Creamy-white, tinted with pink; a strong and vigorous grower, flowering in great profusion almost through the entire season. **1s 6d** each.

Gabrielle Pierrette—Hybrid tea. A seedling from Caroline Testout, with bronzy glazed pink flowers, the petals edged with white; very large, full, and handsome. **1s 6d** each.

Hugh Watson—H.T. Blooms very large and of perfect shape, quite exhibition form buds long and pointed, colour crimson-shaded carmine. **1s 6d** each.

Honourable Ina Bingham—H.T. Pink, deeply veined, blooms semi-double, growth extra robust, free blooming, but too loose for warm districts. **3s 6d** each.

Irene—Hybrid tea. A seedling from Caroline Testout and Mme. Jules Finger, resembling the former parent in habit of growth and shape of flower. The colour is silvery-white, sometimes faintly touched with pink. It may be appropriately termed a white Caroline Testout, surpassing in constancy and purity of colour other light-coloured sports and seedlings from this well-known excellent rose; growth vigorous. **1s 6d** each.

Irish Elegance—Single. Colour bronzy orange-scarlet, free blooming, and quick growing. This variety is in bloom almost the whole season. **3s** each.

Jeanne Proudfoot—Tea scented. Pale satiny salmon-rose tinted, with flesh colour; very large, full, of perfect form, with large thick petals, fine oval buds. **1s 6d** each.

Joseph Hill—Hybrid tea. Salmon-pink shaded with yellow, outside of petals coppery pink; very large, full, of excellent shape, with long, oval buds. First prize at Paris and first-class certificate at Lyons. **2s** each.

Lady Ashtown—H.T. Blooms large and full, with high-pointed centre, buds very long and pointed, petals large and of good substance; colour imperial pink, reflexes of petals silvery pink, growth vigorous, of erect branching character; a good rose for exhibition or garden. **2s** each.

Mrs. David McKee—H.T. Beautiful creamy yellow, growth extra strong and robust, of erect branching habit, with large handsome foliage; a good variety, either for exhibition or garden, being a very free and continuous bloomer. Awarded the gold medal of the National Rose Society, England. **2s** each.

Mrs. Alfred Byass—Tea. Madder rose, shaded crimson, and occasionally blotched and mottled with pale rose and white; a very attractive decorative variety. **1s 6d** each.

Mrs. Conway Jones—H.T. A very beautiful and magnificent variety, possessing every quality required in a good rose. It is a vigorous grower, and of free branching habit, flowering continuously and profusely throughout the season. The blooms are of enormous size, very full, and perfect form. Petals of great size and substance, and very smooth. The colour is creamy white, flushed salmon pink. Highly recommended for exhibition and garden decoration; has gained several first-class certificates. **2s** each.

Pharisaer—Rosy white, centre deep salmon-rose; a very large flower, with fine long buds opening well. **1s 6d** each.

Rev. David Williamson—H.T. Dark crimson, blooms large, and of globular form, growth vigorous. **2s** each.

MILDEW ON ROSES.

THIS disease is very troublesome and difficult to destroy under the old treatment, but Par-Oidium is a thoroughly effective cure for it. It should be applied with a sulphur bellows either before sunrise or after sunset, or better still (if possible) on a dull, moist day. The powder requires to be well distributed on all leaves and branches affected with mildew, and in a few days the disease will disappear.

Par-Oidium is the best Dressing for Mildew.

General List of Roses

NO garden can afford to be without a fair representation of what is justly termed "The Queen of Flowers." By a judicious selection of only one dozen varieties, a bouquet can be secured every week in the year. The following lists will be found to include varieties of sterling merit only.

Dwarf and Hybrid Tea-scented Varieties.

A most desirable class, requiring less attention than other Roses, and furnishing a continuous supply of highly perfumed and beautiful flowers. **1s** each (postage extra on less than half-a-dozen); **10s 6d** per dozen, **post free.**

Admiral Dewey—H.T. A beautiful light blush sport from that universal favourite, Caroline Testout; vigorous.

Alba Rossa (*syn. Mme. Bravy*)—White, rosy centre, large, full, and globular.

Alexandra—Flowers orange-buff, shaded bronze, good shape; first-class for cutting; vigorous grower.

Alliance Franco-Russe—Flowers bright yellow, shaded salmon in centre; strong upright stalk and a long bud. A first-class variety.

American Beauty—H.T. Rosy cerise, large petal and flower, full and fragrant.

Anna Olivier—Rosy-flesh and buff, large and full, very beautiful in bud.

Augustine Hale—H.T. Large and full, globular, rosy carmine, very free blooming.

Aurora—H.T. Bright rose-pink, extra strong branching habit; one of the sweetest scented varieties ever offered.

Archduchess Marie Immacolata—Variable, generally brick-red, shaded salmon and vermillion, large, good form and very full.

Boadicea—Flowers pale peach colour, delicately shaded with pink and violet, the centre richly tinted with rose; large, full, and high-centred; absolutely distinct and of vigorous growth.

Baronne M. Wermer—Outer petals creamy-white and generally edged with carmine, centre rich salmon-yellow, fragrant.

Beauty of Stapleford—H.T. Deep rose, bright carmine centre, large, and excellent form.

Bessie Brown—H.T. Colour alabaster-white, shaded blush in centre, very vigorous; large smooth petal.

Belle Siebrecht—H.T. A cross between Lady M. Fitzwilliam and La France, but having a better habit than either of its parents. Colour, a bright rosy pink, petals very long.

Bridesmaid—Clear bright pink, a grand acquisition in the way of Catherine Mermet, from which it is a sport.

Beauty Inconstant—Coppery red, shaded carmine and yellow, very variable, difficult to describe, quite distinct.

Catherine Mermet—Flesh-rose, full, and of excellent form.

Charles de Legrady—Rosy carmine, large and almost full, fine long bud, branching habit.

Clara Watson—H.T. A beautiful light-coloured rose, of perfect shape, centre shaded salmon and rose.

Comtesse de Panisse—Rosy buff, shaded and veined with carmine and violet, large and well-formed.

Comtesse Frigneuse—Bright canary-yellow, large and full, long beautiful bud.

Comtesse La Barthe—Rosy flesh, globular and fairly full, very free blooming.

Comtesse Naidailac—Bright rosy flesh, base of petals coppery yellow, large, full and of fine form.

Comtesse Riza du Pare—Salmon rose, tinted copper, large, full and free.

Corallina—Deep rosy crimson flowers, shaded coral red; growth vigorous; a charming novelty for decorative work.

Cornelia Kock (*syn. May Rivers*)—Pale straw colour, or nearly white, of extra size, good form, and very full, grand Autumn rose.

Countess of Pembroke—H.T. Soft satiny rose, with deeper centre, extra large, very full, of perfect form, deliciously scented.

Countess Sophy Torby—Summer flowers, peach-red, with coppery red centre; the Autumn flowers bright coppery orange, with salmon centre, very large, full, with handsome regular petals.

Countess of Caledon—H.T. Colour, rich bright rose, flowers extra large, one of the finest exhibition roses.

Dr. Cazeu—H.T. Called by the raiser the "Black Rose," on account of its remarkable colour, which before the petals expand, is almost black.

Devoniensis—Creamy white, blush centre, large, full and well formed.

Dr. Grill—Light rose, with coppery yellow centre, beautiful bud, but not quite full.

Duc de Plantier—Large, full, good shape, coppery rose, yellowish centre.

Duchess of Albany—H.T. A sport from La France, of a much deeper shade of pink; first-rate.

Earl of Jersey—H.T. Deep blood-red, large, full-cupped, dwarf and very free.

Elisa Fugier—Pure white or slightly tinted with pink in the centre, type of the Niphetos, but better habit and generally larger.

Emilie Gonin—Very large, well-shaped, white, tinted orange, each petal heavily edged with carmine, one of the best.

Empress Alexander of Russia—Rich lake red, shaped with orange and fiery crimson, a most uncommon and beautiful colour.

Ernest Metz—Extra size, very full and of perfect form, soft carmine-rose, deeper in centre, vigorous grower.

Exquisite—H.T. Flowers bright crimson shaded magenta, buds large, long and clean, profuse bloomer, very fragrant.

Etoile de Lyon—Bright sulphur-yellow, large, full, well-formed and free.

Ferdinand Jamin—H.T. Large, full and globular, rosy carmine, shaded with salmon, very good.

Francois Dubreuil—Velvety crimson, reflexed with cerise amaranth, a very fine red tea rose, with buds of great beauty.

Gladys Harkness—H.T. Salmon pink, of fine form, large and fragrant, growth vigorous; first-class.

Grace Darling—Creamy-white, shaded with pinkish peach; very large and full of excellent form.

Gruss an Teplitz—H.T. Flowers large, very free and vigorous; an acquisition on account of its colour, which is of the brightest crimson scarlet.

Homer—Pale rose, with salmon centre, petals often bordered with pink, full and good form, blooms in clusters.

Spray freely to keep down insect pests.

DWARF AND HYBRID TEA-SCENTED ROSES—CONTINUED.

- Innocente Pirola**—Cream, with yellowish centre, full and well formed.
- Isabella Sprunt**—Pale yellow, moderate size, well formed and free.
- Jean Ducher**—Variable, bright yellow, salmon and coppery, sometimes shaded with peach, very large, full and globular.
- Jean Pernet**—Large, full and well-formed, centre deep-tawny yellow, passing to light yellow, very free blooming and sturdy habit, first-rate.
- Joseph Metral**—Deep magenta, passing to purple-cerise, large and very full.
- Kaiserin Augusta Victoria**—Pure white, with orange centre, outer petals reflexed, a fine show and garden variety.
- Killarney**—H.T. Colour a delicate China-pink, a lovely rose
- Kronprinzessin Victoria**—A sport from Souv. de la Malmaison, white, tinted sulphur-yellow at base of petals, useful.
- La France**—H.T. Pale peach colour, reverse deep rose, large, full and well formed, very free and fragrant.
- La Tosca**—H.T. Soft pink, tinted rosy white and yellow, large and full.
- Lady Mary Corry**—T.S. Deep golden yellow, blooms large, full, and perfectly formed; a valuable addition to this class.
- Lady Mary Fitzwilliam**—H.T. Bright clear rose, very large, globular and full, sweetly scented.
- Lady Roberts**—T.S. Reddish apricot, the base of the petals coppery red, large, full, and of good shape; first class.
- Liberty**—H.T. Flowers brilliant crimson, constant bloomer, keeps its colour well after being cut, said to be the most brilliant of all the H.T.'s.
- Lord Tarquin**—Pale flesh, large, full and free.
- Louis Leveque**—Reddish-yellow, shaded chamois and vermilion, bloom lasts well, tree of good habit.
- L'Innocence**—H.T. Large, full and globular, of a brilliant whiteness, very vigorous, a white seedling from C. Testout, one of the most prolific bloomers, and most useful for florists' work, splendid bushy habit.
- Mamie**—H.T. A rose of undoubted merit and distinctness, possessed of vigorous growth, free branching habit, and great freedom in flowering; the flowers are strongly scented, and of a rosy carmine colour, with a distinct yellow zone at base of petals; the blooms are very large, full and perfectly formed, with a high pointed centre, petals large, smooth, and of great substance.
- Ma Capucine**—Deep orange, or copper colour, shaded rose, beautiful in bud.
- Madame Camille**—Delicate salmon-pink, very large, full and free, first rate.
- „ **Caroline Kuster**—Light yellow, centre deeper and sometimes coppery, large, full and globular, abundant bloomer.
- „ **Charles**—Rich apricot, medium size and full beautiful in bud.
- „ **Chedane Guinoisseau**—Bright canary-yellow, beautiful in bud, very free.
- „ **de Watteville**—Creamy white, each petal edged with rose like a tulip, large and full, stout petals, quite distinct, exceedingly fragrant.
- „ **Falcot**—Deep apricot-yellow, very beautiful in bud.
- „ **Hippolyte Jamin**—Outer petals large, white tipped with blush, centre small petals coppery yellow, shaded rose, large, full flower.
- „ **Hoste**—Pale straw colour or fawn, large, full, well formed, and very free.
- „ **Lambard**—Salmon-pink, shaded rose, large and fairly full.

- Mdm. Edward Helfenbein**—We have several roses which are described as being "coppery," but this answers the description better than any we have yet seen, being a rich, metallic copper.
- Mdm. Vermorel**—Rose and coppery, yellow centre shaded and lined with red; extra large buds on strong stems; growth vigorous; most distinct; we can highly recommend as a first-class novelty.
- Mdm. Jean Dupuy**—Yellowish rose, with reddish golden-yellow centre, the outer petals edged with rose; large and full, opening well; growth vigorous; first-class.
- Maman Cochet**—Flesh rose, shaded salmon-yellow, fine long bud, first class
- Mdm. Caroline Testout**—H.T. Very large and globular, bright, flesh pink, in the way of La France, not so full, but with immense petals; fragrant.
- Mdm. Elie Lambert**—Large, full, and well formed, beautiful flesh rose, passing to satiny white at edge of petals; free and sweet.
- Mdm. Honore Defresne**—Rich golden, yellow centre, often shaded red, large, full, fragrant, and free blooming.
- Mdm. Laurette Messimy China**—Bright China rose, base of petals yellow, very free, beautiful bud.
- Mdm. Phillip Kuntz**—Rosy cerise, shaded salmon-flesh.
- Mdm. P. Perney**—Beautiful saffron-yellow, very fine bud, vigorous grower.
- Mdlle. Augustine Guinoisseau**—H.T. A sport from La France, outer petals creamy white or very pale flesh, centre soft pink, perfect form.
- Mdlle. Francisca Kruger**—Variable, coppery yellow and peach, sometimes one shade sometimes the other predominating; profuse bloomer.
- Mdlle. Christine de Noue**—Large, full, and good form, rosy lake, outer petals darker and shaded with purple.
- Marquise de Salisbury**—H.T. Bright, velvety red, medium size, semi-double, very free blooming; a very effective garden rose.
- Marie van Houtte**—Pale yellow, generally edged with rose, large, full, and well formed.
- Marquise de Vivens**—Bright rose, centre shaded yellow, long, pointed bud, not full, very free and fragrant.
- Medea**—Large globular flower, full and well-formed, lemon yellow, with canary centre; free bloomer.
- Miss Ethel Brownlow**—Pink, petals shaded yellow at base, large and full.
- Mildred Grant**—H.T. Silvery white, edge of petals shaded with pink, blooms extra large and massive, great substance in petals, lasts extra well; this is, when properly grown, one of the best exhibition roses.
- Mrs. James Wilson**—Large and well-formed, colour intermediate between The Bride and Marie van Houtte.
- Mdm. La Baronne de Berge**—Creamy white, edged with lilac, perfect shape, an improvement on Homer.
- Mdm. Jules Grolez**—H.T. Brilliant China rose, vigorous grower, of branching habit, free bloomer, of fine form.
- Marie Christiana Reine d'Espagne**—Bright purplish poppy red, of good shape; a welcome addition to the red teas
- Muriel Grahame**—A cream sport from Catherine Mermet, habit similar to the parent; a good show variety.
- Marquis Litta**—H.T. Carmine rose, with vermilion centre large, full, and vigorous.
- Mdm. Abel Chatenay**—H.T. Rosy carmine, shaded with salmon, large and good form.
- Mrs. E. Mawley**—Colour the richest salmon rose, flowers large and full, high centre, one of the best new roses.

Correspondents are invited to report results.

DWARF AND HYBRID TEA-SCENTED ROSES—CONTINUED.

- Mrs. B. R. Cant**—Deep rose on outer petals, and in the Autumn frequently a rich red, inner petals soft silvery rose suffused with buff at the base, of good substance, and very symmetrical in form; a hardy variety and vigorous grower.
- Mrs. Reynolds Hole**—Large full flower, deep shaded crimson; produced singly on long stalk; vigorous; fine brown foliage.
- Niphetos**—Pure white or pale lemon, very long, beautiful bud.
- Papa Gontier**—H.T. Semi-double, very large petal, bright rose, reverse rosy crimson, fine, well formed.
- Paul Nabonnand**—Satiny rose, veined with peach, large, full, and well formed.
- Perle des Jardines**—Canary-yellow, large, full, and globular; one of the best.
- Perle de Sagan**—Velvety crimson, with purplish shade, loose when expanded, but attractive.
- Perle Bonnie**—H.T. Rich crimson, long bud, good winter bloomer, semi-double, delicious perfume.
- Perle von Godesberg**—H.T. A golden sport from Kaiserin A. Victoria; highly recommended from Germany, where it originated.
- Queen Olga of Greece**—Flowers deep soft rose-pink, centre shaded yellow, large and of good shape, quite distinct colour.
- Rainbow**—Large and well formed, semi-double, in the way of Papa Gontier, soft rose, striped with carmine, very effective.
- Reubens**—White, shaded rose, yellowish centre, large, full, fine form.
- Safrano**—Deep apricot, very free, good in bud.
- Sappho**—Outer petals pale buff, centre apricot, large, very well formed, a most profuse bloomer.
- Shirley Hibberd**—Nankeen-yellow, small, cupped and double, good buttonhole rose.
- Souvenir de Paul Neyron**—Creamy white, rosy buff centre, full, well formed, free.
- Souvenir de Therese Levet**—Dark red, shaded maroon, fine bud.
- Souvenir de la Malmaison**—Pale flesh, with deeper centre, very large and full.
- Souvenir de Catherine Guillot**—Colour orange-red, tinted carmine on yellow ground, an exceedingly beautiful combination of colours.
- Souvenir d'Auguste Legros**—Large, full, dark red, shaded crimson.

- Souvenir de President Carnot**—White, tinted rose, large, full and well formed, long, beautiful bud.
- Souvenir de Wootton**—H.T. Large, fairly full, bright red, cupped form, free bloomer, strong grower.
- Souvenir de Elsie Vardon**—Creamy-white, with yellowish centre, petals sometimes rosy-edged, large and full.
- Souvenir de Pierre Notting**—Known as yellow Maman Cochet, fine apricot yellow, washed with golden yellow and shaded with orange.
- Souvenir d'un Ami**—Salmon-rose, large and fairly full.
- Souvenir du Rosieriste Rambaux**—Creamy-yellow, edged carmine-rose, medium size, cupped and fragrant.
- Souvenir de William Robinson**—Four colours are present in this rose, viz., rose, creamy-white, apricot, and violet. This combination of colours produces a very beautiful effect; vigorous.
- Sunset**—Deep apricot, large and full, good in all stages, sport from Perle des Jardins.
- Sunrise**—This is a fine new rose, the first sport from Sunset; outer petals reddish-carmine, shading to delicate fawn and pale salmon in the centre.
- The Bride**—Sometimes pure white, generally with a greenish tinge, and the outer petals often flushed with pink, a sport from Catherine Mermet.
- The Meteor**—H.T. Rich velvety-crimson, good size, full, well formed, profuse, continuous bloomer.
- The Queen**—A pure white sport from the old Tea Rose, Souvenir d'un Ami, free bloomer.
- Triomphe de Pernet Pere**—H.T. Large, full and well formed, light red, a good grower and full bloomer.
- Viscountess Folkestone**—H.T. Uniform creamy-pink, large, full and globular, free blooming and exceedingly sweet.
- White Perle**—Long, beautiful bud, creamy-white or pale lemon yellow, outer petals often tinged with rose, a very vigorous grower.
- White Lord Tarquin (White Bougere)**—A pure white sport from that well-known favourite, Lord Tarquin, a constant bloomer and a good lasting flower.
- William Francis Bennett**—H.T. Brilliant crimson, large, not full, long, beautiful bud, unequalled for buttonholes.
- White Maman Cochet**—A sport from Maman Cochet. The habit of growth and shape of flower are identical with the parent, the outside petals are white, shaded with rosy blush, the centre almost pure white.

Climbing Roses.

NOTHING can surpass the brilliancy and grandeur of this class when carefully trained on trellis, wall, or other erection; they produce their lovely fragrant flowers by the thousand.

1s each; 10s 6d per dozen, post free.

- Ards Pillar**—H.T. Rich velvety crimson, large, full, and of cupped form.
- Ards Rover**—H.P. A valuable addition to our climbing roses, of perfect shape, and a colour equal to Prince Camille de Rohan.
- Allister Stella Gray (Noisette)**—Enormous clusters of small pale yellow flowers, with orange centre, splendid for buttonhole and other decorative work.
- Bardou Job**—Bright glowing crimson, shaded with black, semi-double, a most distinct and striking rose of great merit.
- Billiard and Barre**—A beautiful new climbing rose of a rich golden orange colour, with large handsome foliage.
- Celine Forestier**—Pale yellow, sometimes with coppery centre, large flower, composed of a great number of small petals, very free and useful.
- Climbing Belle Siebrecht**—H.T. A strong climbing sport from Belle Siebrecht: bright rosy-pink, sweetly perfumed.
- Climbing Caroline Testout**—H.T. A vigorous climbing sport of this universal favourite: good climbing habit.
- Climbing Cecile Brunner**—A strong climber of the dwarf variety; very good.

Nothing can exceed the beauty of Climbing Roses.

GENERAL LIST OF ROSES (Climbing)—CONTINUED.

- Climbing Niphetos**—White, a vigorous growing and free blooming sport from the old dwarf variety.
- Climbing Souvenir de la Malmaison**—Flesh, a sport from the well known old Bourbon of the same name, a rampant climber, and free blooming when established.
- Climbing La France**—Pale flesh; a climbing sport from the well-known favourite, flowers in every respect similar to the old variety.
- Climbing Perle des Jardins**—A climbing sport from the old variety, and one of, if not the best, of yellow climbers.
- Climbing Kaiserin Augusta Victoria**—H.T. White with citron centre; without doubt the best climber of its colour.
- Climbing Meteor**—H.T. A strong climbing sport from that most brilliant of all roses, Meteor; colour velvety crimson.
- Climbing Souvenir de Wootton**—H.T. A welcome addition to our red climbers; of extraordinary vigour and beautifully scented.
- Climbing Comptes Labarthe**—A vigorous climbing sport from the well-known dwarf variety.
- Cloth of Gold**—Pale sulphur-yellow, with deeper centre, large, nearly full, well formed.
- Carmine Pillar (Paul's)**—A single-flowering variety of the brightest crimson, keeps well when cut; dark green foliage.
- Duchesse d'Auerstadt**—Yellow, with nankeen centre; large, full, well formed; very vigorous grower.
- England's Glory**—A magnificent climbing rose; flowers large, full and well-formed; centre of flower is similar in colour to Belle Seibrecht, but with more substance; the outside petals are pale satiny pink.
- Francois Crousse**—Bright crimson, sometimes fiery-red, large, full, and of good shape; hardy for its class and a good acquisition as a red climbing rose.
- Gloire de Dijon**—Yellow and buff, shaded salmon, large and full, free.
- Golden Queen**—A splendid yellow climber.
- James Sprunt**—Very rich scarlet-crimson, large, full, globular, blooms in clusters, sweet; a Bengal rose.
- Lamarque**—White centre, tinged with yellow, medium size, full, blooms in clusters.
- L'Ideal**—Coppery rose and yellow, with deeper shades and stripes, variable, producing beautiful buds of the Ma Capucine type.
- La France de '89**—Bright cherry-red, sweetly scented; makes a good pillar rose.
- Mdm. Andre Duron**—H.T. Bright China pink, medium size, sweetly scented, useful.
- Madame Berard**—Salmon rose, shaded yellow, large, full, good shape.
- Madame Pierre Cochet (Noisette)**—A seedling from William Allen Richardson, base of petals golden yellow, passing to yellowish white.
- Madame Wagram Comptess de Turenne**—A beautiful climbing variety, with large flowers of a satin rose colour, a new colour in climbers.
- Marechal Niel**—Rich golden yellow, very large globular, full, exceedingly fragrant, unrivalled as a climber.
- Mons. Desir**—Rich crimson-maroon, vigorous climber, sweetly scented.
- Noella Nabonnand**—Extra large, semi-double, velvety crimson flowers with very large petals, very sweet; handsome in bud, more vigorous than Reine Marie Henriette.
- Reine Marie Henriette**—Bright rosy cerise, sometimes crimson, large, full, long petal, good shape.
- Reve d'Or**—Deep coppery yellow, large, full, well formed, fragrant and free, an excellent pillar rose.
- Rev. T. C. Cole**—Bright yellow, large, and well shaped, intermediate between Marechal Niel and Cloth of Gold.

- Solfaterre**—Sulphur yellow, large and double.
- Souvenir de Madame Metral**—H.T. Bright red with a shade of vermilion, perfect shape, very large and full.
- Waltham Climbers, Nos. 1, 2 & 3**—H.T. Various shades of crimson; No. 1 is the lightest, large, very fragrant; No. 3 is the darkest, fine, show flower.
- William Allen Richardson**—Deep orange-yellow, small, full and free.
- White Marechal Niel**—N. A creamy white sport of M. Niel originated in America. Quite distinct from the original, though not a pure white.

Hybrid of Polyantha Roses.

- Anne Marie de Montravail**—Pure white, about the size of a florin, very full, beautifully imbricated, large bunches.
- Etoile d'Or**—In the way of Perle d'Or, but rather smaller, outer petals pale chrome, centre deep lemon.
- Eugenie Lamesch**—Bushy, flowers ranunculus shaped, and produced in trusses of 20 to 30 blooms; colour orange-yellow passing to clear yellow, shaded rose.
- Leonie Lamesch**—Growth erect. The blooms are of medium size, full, produced singly, colour bright copper-red with golden centre, a most charming effect, very distinct and beautiful.
- Mlle. Cecile Brunner**—Delicate salmon-pink, deep salmon or coppery centre, small, full, pretty shape, and delicately scented.
- Perle d'Or**—Nankeen-yellow, buds deep apricot, medium size, full, free blooming, dwarf, vigorous grower.
- Petite Constant**—A new polyantha rose, bearing immense quantities of flowers and buds of a good shape, of a coppery colour.
- Red Pet**—Much smaller than the ordinary Bengal or China Rose, dark rich, crimson, free, dwarf habit.
- White Pet**—Pale pink, changing to white, small and full, produced in large clusters, dwarf.

Climbing Polyanthas.

- Aglaia**—Is a beautiful bright yellow variety, almost ever-green, and bearing immense clusters or trusses of rosette-shaped flowers, sweetly scented.
- Climbing Mds. Cecile Brunner**—This sterling novelty will prove a welcome acquisition in climbers. It is a strong, vigorous grower, and blooms profusely all the year round; flowers similar to the dwarf variety.
- Crimson Rambler (Turner's)**—Flowers large for its class, which are produced in large trusses of a dazzling crimson, very vigorous, foliage bright glossy green.
- Euphrosyne**—The pink Rambler. Flowers in clusters of a delicate shade of carmine pink.
- Thalia**—Flowers pure white, long, trailing branches.

Moss Roses.

- Baron de Wasenaer**—Light crimson, cupped, very showy.
- Blanco Moreau**—Pure white, perfect form, well mossed.
- Comptess Murinais**—White shaded blush, good grower.
- Crimson Globe**—Deep crimson, well mossed buds, flowers large, full and globular.
- Crested Moss**—Beautiful buds, heavily crested with moss, pink, flowers small.
- Little Gem**—Crimson buds, beautifully mossed, bushy grower.
- White Bath**—Paper white, flowers in clusters, very beautiful in the bud.
- Wm. Lobb**—Dark red, shaded purple.
- Zenobia**—Fine satin rose, large, full, and fragrant, well mossed.

Should soil be dry, water a day or two before planting.

GENERAL LIST OF ROSES—CONTINUED.

Hybrid Perpetual or Occasional Roses.

1s each; 10s 6d per dozen, post free.

- Alfred Colomb**—Bright red.
A. K. Williams—Carmine-red.
Ben Cant—Remarkably strong and sturdy in growth, with fine foliage; every shoot produces blooms and is thoroughly perpetual; colour deep clear crimson, with darker flushes in the centre and dark veining throughout, and highly perfumed. Fine exhibition rose.
Black Prince—Dark crimson.
Boule de Neige—Medium size, full, good shape, white, good Autumn rose.
Capt. Hayward—Bright crimson-carmine, very large, bold petal, strong grower, almost perpetual.
Capt. Christy—Rosy flesh, deep in centre, a grand rose.
Charles Lefebvre—Bright deep crimson.
Colonel Felix Breton—Velvety red, shaded amaranth.
Dinsmore—Bright cherry red, a constant bloomer, good garden variety.
Dr. Hogg—Violet-red, best of its shade.
Duke of Edinburgh—Rich crimson-scarlet, shaded maroon, very free blooming.
Dr. Rausppler—Dark velvety crimson, shaded black, almost perpetual.
Earl of Dufferin—Velvety crimson, shaded maroon, very large, full, perfect form, free blooming, superb.
Frau Karl Druschki—Snowy white, extra fine in bud, a strong growing variety, producing flowers of exceedingly handsome appearance both on plant and when cut.
Emperor de Maroc—Rich velvety maroon, an old favourite.
General Jacqueminot—Blood-red, fine.
Grand Mogul—Deep crimson, shaded scarlet and black.
Gustave Piganeau—Carmine-lake, very large globular.
Heinrich Schultheis—Delicate pinkish-rose, very large, perpetual.
Horace Vernet—Velvety purplish red.
Her Majesty—Clear, bright satiny rose, extra large, strong grower, best of its class.
Jubilee (Henderson's)—H.P. This is said to be the finest of all dark roses; the flowers are large, measuring six inches in diameter, and last well when cut, and are very sweetly scented.
John Hopper—A very old favourite, deep rose, reverse of petal silvery white, very full.
Jean Liabaud—Velvety crimson, shaded black.
Jeannie Dickson—Rosy pink, excellent form.
John Bright—Brightest scarlet-crimson.
Lord Macaulay—Deep crimson, shaded maroon, nearly perpetual.
Louise Van Houtte—Reddish scarlet, shaded amaranth, free blooming.
Mabel Morrison—A white sport from Baroness Rothschild, sometimes flushed pink.
Madame la Baronne de Rothschild—Clear pale rose.
Margaret Dickson—White, with pale flesh centre, said to supersede Merveille de Lyon.

- Marie Bauman**—Bright red, large and full.
Mrs. Harry Turner—Crimson-scarlet, shaded maroon.
Mrs. John Lang—Soft pink, nearly perpetual.
Merrie England—H.P. This beautiful rose is a striped sport from that grand old variety, Heinrich Schultheis. It has proved very constant, and so far is the best striped rose we have seen.
Mrs. R. G. Sharman Crawford—Rosy pink, very fine, said to rival Mrs J. Laing.
Marchioness of Londonderry—Large ivory-white, fragrant.
Old English Cabbage—Rosy red, an old favourite on account of its perfume.
Paul Dupuy—Dark velvety maroon, shaded black.
Paul Neyron—Deep rose, immense size, strong grower.
Pierre Notting—Very dark, shaded violet.
Pride of Reigate—A very beautiful sport from Countess of Oxford, grand colour, carmine-red, striped and splashed with pale pink; being a sport it may sometimes revert to one colour; any portion of the tree which does so immediately should be pruned away.
Prince Camille de Rohan—Velvety crimson, maroon shaded black.
Roger Lambelin—This is, perhaps, the most remarkable rose ever raised as regards colour; the ground colour is of a bright crimson, almost a scarlet; the petals are deeply serrulated at the edge, and are margined with a pure white band, giving the flower a most remarkable and striking appearance.
Robert Duncan—A fine exhibition flower of a deep rosy lake.
Souvenir William Wood—Purple, maroon, shaded black.
Xavier Olibo—Velvety crimson, shaded amaranth.

Miscellaneous Roses.

- Rose Button**—Rose colour, with deep centre, small, full, and pretty shape; produced in clusters. foliage handsome, coppery in Autumn. A pretty buttonhole variety, of climbing habit.

BRIARS.

- Copper-coloured Variety** (*Rosa lutea-punicea*)—Flowers single, the upper surface of petals intense dark scarlet, reverse chrome yellow, very effective.
Persian Yellow—The richest yellow, large and double.
Austrian Yellow—A single-flowering briar, with rich yellow flowers.
Soliel D'Or—H. A remarkable Hybrid, being a cross between Persian Yellow and Antonie Doucher; flowers golden-yellow, shaded orange and red; strong growth, very distinct.

BANKSIAN.

- Alba**—Pure white, very small and full, produced in bunches, very sweet, a strong climber.
Lutea—Similar, but of buff yellow.
Fortuni—White, large flower, very vigorous.
Fortune's Yellow—Bronzy-yellow, semi-double, moderate climber.

REMEDY FOR "SAN JOSE SCALE."

When first the scale is discovered in the orchard, and it can only be found on a few trees, prune these well back, and paint them with pure kerosene. If care is taken not to miss any part of the tree this treatment will completely rid it of this pest.

Where, however, the scale has become well established, and hence it might be impracticable to paint each tree with pure kerosene, all deciduous trees should be sprayed with lime, sulphur, and salt solution before the buds begin to swell. If the trees are badly infested an application might be given as soon as the leaves have fallen in the Autumn, when the trees are dormant. The tree should be thoroughly done, and care observed not to miss any part of it.

To secure success, sow and plant at the proper season.

Verbenas.

THE most effective way of growing this beautiful tribe of plants is to train them on sticks, forming a trellis two feet in diameter and three feet high, or of such dimensions as the grower may prefer. We supply suitable sticks for the purpose. 9d each; 6s per doz.

Ajax—Crimson, white eye.

Brilliant—Rich velvety crimson, clear sulphur eye.

Columbia—Dark magenta, splendid.

Countess of Ellesmere—Red and white striped.

Incomparable—Scarlet, shaded with purple, fine.

Lilywhite—Pure white, strong grower.

Lovie—Light purple, white eye.

Mayoress of Sydney—Pure white, green eye.

Mayor of Geelong—Cherry-red, large white eye.

Nellie—Bright crimson, large white eye, very showy.

Rattray's Scarlet—Bright scarlet, yellow eye; a fine growing variety.

Rose Fillows—Clear rose, extra fine, large truss.

The Duke—Crimson, shaded with maroon, very large truss, strong grower, fine.

Wm. Elliott—Flesh colour, shaded pink, very large truss and pips.

Violets.

It will be freely admitted that this flower is a general favourite. The varieties introduced during the past few years have proved exceptionally fine, both in flower and productiveness. They like a cool and moist situation, and should be mulched during summer.

Admiral Avellan—Rich purplish crimson, flowers single and borne on long stems. 2s per dozen.

California—Rich deep blue, flower large and produced very freely. 2s per dozen.

Count Brazza (*syn. Swanley White*)—Pure double white. 2s 6d per dozen.

John Raddenberry—Single, colour pale blue, a very strong-growing violet, and very hardy; the flowers produced on long footstalks. 2s per dozen.

Marie Louise—Large double blue flowers. 2s 6d per dozen.

Neapolitan—Double flowers of delicate mauve colour. 2s per dozen.

Princess of Wales—A vigorous-growing and free-flowering variety, producing extra large single flowers of a true violet blue, very fragrant. 2s per dozen.

The Czar—Single, dark blue, sweet scented. 1s 6d per dozen.

White Czar—Single, pure white. 2s per dozen.

Useful Tables for Planting.

THE TABLE for planting Hedgerows, &c., was prepared by the late Hon. P. L. C. Shepherd, and has been so highly appreciated that it will now be found in nearly every Colonial Catalogue, as well as in very many European and Continental Catalogues, side by side with the old and useful Table accompanying it. These Tables are of the utmost value to persons about to plant, as they are enabled at a glance to ascertain the number of plants or trees required for any given area, from a quarter of an acre of onions at a foot apart to a plantation of a thousand acres with its giant trees at thirty or more feet apart.

Table showing the number of plants required to plant an acre of land from 1 foot to 30 feet plant to plant.

PACKING. Our system of packing (the result of years of careful study) cannot well be surpassed; in proof of which we insert the following letter from Central Africa, 400 miles inland from Mombasa:—

From STUART WATT, Esq., Ngelani Mission, Ukamba, British East Africa.

Dear Sirs,—I beg to intimate to you that the Fruit Trees you shipped on the 14th June *via* Aden and Mombasa have come to hand. The condition in which these trees have arrived after their long voyage and transport per caravan is even superior to that of any former shipment we have had from you, and I feel intensely grateful to your firm for the conscientious care exhibited in packing, and for sending Fruit Trees of such excellent quality.

Our system of packing enjoys a world-wide reputation.

THE ORCHARD OR FRUIT GARDEN

THE following general advice on the Management of the Orchard was written by the late Mr. P. L. C. Shepherd over twenty-two years ago, and in consequence of the numerous assurances which reach us from correspondents of the valuable assistance derived from its perusal, we still continue its publication.

SOIL.

The soil for fruit trees should be of good quality. Such as will produce good crops of corn and potatoes will, as a rule, be the best for fruit trees. Poor hungry soil is unfavourable for both, but doubly so for the latter; for while it only lessens the quantity of farm crops, it lessens the quantity and injures the quality of fruit.

Soils vary in many particulars; but, as a general rule, one which is dry, mellow and fertile is well suited. It should be sufficiently deep to allow a proper extension of the roots, and dry or well drained to prevent injury from stagnant water.

If the whole area cannot be treated prior to planting, strips, six to eight feet wide, where the rows of trees are to stand, should be prepared either by trenching or ploughing. If the latter process is adopted it will be necessary to plough twice or thrice to ensure the loosening of the ground to sufficient depth.

MANURE.

For general use nothing is equal to stable manure, if properly prepared by stacking till thoroughly decomposed, more especially if it is made the basis of a compost and mixed with surfacings from forest lands in equal parts, and bonedust in the proportion of one-twentieth, which should be laid layer upon layer to form a heap. This will be still further improved if allowed to remain five or six months before use. It should then be cut down in a face and carted to the prepared ground. We do not, however, recommend manure in every instance. Where soils are naturally rich, manuring may be dispensed with to advantage till the trees commence fruiting; in every case the best method of applying manure is to evenly distribute it at a depth of not more than six to twelve inches below the surface. For this purpose a digging fork is better than a spade, as the latter is more likely to injure the roots. A well-drained subsoil is of the utmost importance. Manure is perfectly useless on land soaked with water. Drain tiles should be laid from three and a half to four feet deep, midway between the rows of trees, and where the drain tiles cannot be procured, broken stones, about two to four inches in diameter, will answer admirably, if put in the bottom of the drain to the depth of about a foot—the narrower the drain is at the bottom the better.

SITUATION AND ASPECT.

It is highly important that situation and aspect be well considered. An easy slope with a north-easterly aspect is about the best to select in the vicinity of Sydney, or, as a rule, in the County of Cumberland; but local circumstances must not be overlooked—prevailing and destructive winds are in a great measure influenced by the lay of the country, and require to be carefully guarded against; and where a thorough natural protection is not afforded, art must supply it, as shelter is indispensable to secure success in fruit growing. Trees of rapid growth and small wiry foliage, such as the Pine family, are the best to plant for this purpose; or where sufficient space is afforded, an efficient shelter may be provided by planting an ornamental belt, composed of a variety of trees and shrubs, thus securing a double advantage of defence and ornament. Care must be taken to plant the shelter belt a sufficient distance (say about half a chain at least) from the first row of fruit trees, to leave them beyond the reach of their roots or shade, and to be well exposed to the sun and air.

LAYING OUT AND PLANTING.

The land ought to be properly prepared fully three months prior to planting; in the first instance by breaking up as

roughly as possible, so as to admit of the influence of the sun and atmosphere to pulverize it; then, immediately before planting, it should be levelled to the surface, or, what is better still, crop the land one season before planting. Nothing can be more unsightly than an orchard laid out with trees at irregular distances, in crooked lines, and so on. To provide against this, a regular system should be adopted throughout, and, to secure uniformity, the whole area should be staked or marked out where each tree has to be planted. For this purpose either sticks or split pegs will answer. Then procure a long line and tie a piece of red tape or other material at every twenty feet, or at such other distance along the line as it is intended to plant the trees; stretch the line where it is intended to plant the first row, and drive in a stick or peg at each mark on the line. The line should next be stretched at right angles and stakes driven in at required distance as before until the square or oblong, as the case may be, is complete. All that now requires to be done is to fill up the centre by stretching the line from stake to stake and pegging line after line till the whole of the stakes are placed. Planting may then be proceeded with. For this purpose a calm, moist day should, if possible, be selected, and the trees taken to a convenient spot in the enclosure and heeled in, or well covered with bagging or other material, to prevent the roots being too much exposed. All unnecessary shoots must be removed, and every shoot should be shortened to save the trees from being blown about by the wind. Remove all roots bruised or wounded by the spade in lifting, with a good sharp knife, making a clean smooth cut. It is an advantage to dip the roots immediately before planting into soft mud, which can be readily prepared by filling a small hole or tub with water and mixing it with soil. This treatment facilitates the healing of the cuts, and encourages the young roots to start. A tree should not be set deeper than it stood before removal, and only sufficient earth removed to admit the roots freely when extended to their full length. Place a little fine broken soil over the roots and immediately round the stem of the trees, which should then be shaken so as to allow the soil to get well about the roots; press the soil round the stem with the foot, fill in, and gather the earth round the stem, raising it about three inches above the surrounding surface to allow for settling. A gallon or two of water may be used with each tree before the earth is gathered round; this settles the earth nicely about the roots. Stake every tree firmly at once; good split stakes, six feet long and one and a half to two inches in diameter, will answer best. These should be firmly driven in close to the stem and tied in two places, making two distinct ties of each, viz., one tightly round the stake and loosely round the tree. The sooner trees are planted out after the fall of the leaf the better, as they become thoroughly settled and established in the soil before the Summer comes round. Orange and other evergreen trees may be planted in March, but not unless the soil is in perfect order; avoid planting during frosty weather, unless ample shelter can be afforded, such as branches of ti-tree, etc.

DISTANCE FOR PLANTING.

This must be regulated, in a great measure, by the quality of the soil, as well as the description of trees to be planted. As a rule, the distance should run from eighteen to thirty feet each way, the greatest space being given to the rich soil and largest growing trees, as Oranges, Pears, Apples, etc. Eighteen to twenty feet will generally be found ample for Peach, Apricot, Nectarine, and other stone fruits.

Plant Healthy Young Trees in preference to Old Ones.

THE ORCHARD OR FRUIT GARDEN—Continued.

PRUNING.

This operation should be performed during the months of June and July, or as soon after as possible, and the best general directions we can give are to shape the tree well and keep the centre open. A good sharp knife only is to be used, and a clean cut made clear of the bud. Of course the saw will be necessary for large branches, but even then it is better to cut the sawn part with a knife, as the cut heals much sooner.

CULTIVATION OF THE SOIL.

Cultivation is of the greatest importance for four or five years after planting. Young trees cannot succeed under the treatment they too frequently receive. It often happens that a piece of ground is properly prepared in every way, and the trees carefully planted; but there the matter ends. Weeds and grass of every description are allowed to grow, the surface becomes hard and baked, all moisture is drawn from the soil, and naturally enough the tree languishes, and ultimately dies. Some cultivate green crops, as barley, oats, sorghum, etc., in the whole space, thinking it a great advantage to the young trees. We admit that it is preferable to neglect, but even this plan injures the young trees, particularly if the crop be allowed to come too near them. When such practice is determined upon, no crop should approach nearer the stem than the height of the tree at least; thus, if a tree is six feet

high, it should have a clear space fully twelve feet in diameter entirely to itself; and this must be kept perfectly clean and the surface broken, particularly after heavy falls of rain. Never allow the soil to present a hard, battered appearance. It is difficult to over-estimate the advantage of keeping the surface of the soil clean and broken; the trees in an orchard so treated will rarely suffer from drought. We prefer the quincunx system of planting, as by its means all trees are equally distributed over the ground.

MULCHING.

In dry seasons mulching will be found of the greatest advantage; by its aid good crops may be secured where without it a complete failure would result. The best material for mulching is a short stable straw, but where this is not obtainable, various substitutes may be used; but it is always desirable to employ some good fertilising material if possible. The following will answer:—Dry grass, garden weeds, forest scrapings, broken up cow droppings, stockyard cleanings, etc. The surface of the soil should be broken up to a depth of three or four inches to a radius equal to the height of the tree to be mulched; then spread the mulch over the surface of the broken ground two to four inches thick, leaving an open space of about six inches round each tree. October is about the best month for mulching, but it may be done during any of the Summer months; it may be dug or chipped in as manure in April or May, or earlier if the season is moist.

DRAINING.

A thorough system of Draining is as essential to the proper cultivation of the soil as ploughing, trenching, manuring, or any other operation. Drains should (if possible) not be less than four feet deep, and may be constructed of various materials, such as broken stone, or brick, wood, etc. Drain tiles are, however, the most effective. Land well drained retains moisture a very much longer time than that which is not drained. The following table gives the number of Tiles required to drain an acre of land, placing the drains at various distances, from 10 feet to 50 feet apart. The tiles are each 1 foot in length:—

10 feet apart	12 feet apart	15 feet apart	17 feet apart	18 feet apart	20 feet apart	25 feet apart	30 feet apart	35 feet apart	40 feet apart	50 feet apart

Insect Pests and Diseases, and their Remedies.

SPRAYING COMPOUNDS.

We give the principal formulas for Fungicides and Insecticides.

Bordeaux Mixture, for spraying in Spring against insects, black spot, etc., is made by dissolving 6 lb. of sulphate of copper in 5 gal. of water. Slack 4 lb. of fresh lime in 6 gal. of water, and when cool strain into the copper mixture; dilute to 22 gal. This can be used half strength, with about equally good results, if it is applied thoroughly. Paris Green can be used with the Bordeaux Mixture, about 2½ oz. to every 40 gal. of mixture. Insects and fungi can then be combated at the same time.

Ammoniacal Solution of Carbonate of Copper, especially for grape vines.—Dissolve 5 oz. of carbonate of copper in three pints of ammonia of a strength of 22 deg. Stir rapidly until the copper dissolves. Dilute to 40 gal. or 50 gal. when wanted for use. For the same purpose as Bordeaux Mixture, and easier to apply, but probably not so good as a fungicide.

Eau Celeste is for mildews, rots, blights, etc. Dissolve 1 lb. of sulphate of copper in 2 gal. of water; in another vessel 1 lb. of carbonate of soda, and mix the two solutions. When chemical reaction has ceased, add 1½ pint of ammonia, 22deg., and dilute to 25 gal. of water.

Paris Green is the best general insecticide. For most purposes use 1 lb. to 160 gal. of water, keeping it well stirred when using. London Purple can be used in the same way but it is usually more caustic to foliage than Paris Green.

Sulphur, Lime and Salt Wash, for San Jose and other scales. Winter spray for deciduous trees. Take 30 lb. of unslacked lime, 20 lb. of sulphur, 15 lb. of salt, and 40 gal. of water. To mix, take 10 lb. lime, 20 lb. of sulphur, and 20 gal. of water; boil for not less than one hour and a half, or until the sulphur is thoroughly dissolved, when the mixture will be of a light amber colour. Slack 30 lb. of lime in a barrel with hot water, and when thoroughly slacked, but still boiling, add 15 lb. of salt; when this is dissolved, the whole should be added to the lime and sulphur in the boiler, and the whole boiled for half an hour longer, when water, to make the whole up to 50 gal., should be added. Strain through a wire sieve, and keep well stirred whilst in use.

Kerosene Emulsion for Codlin Moth.—Dissolve 1 pint of soft soap, or ¼ lb. of hard soap, preferably whale oil, in 2 quarts of hot water, and add 1 pint of kerosene. Mix thoroughly while the mixture is still hot, until a perfect emulsion is formed—one that does not separate when cold. For use dilute with 15 parts of water.

Lye Wash for red and white scale.—1 lb. of concentrated lye to 1 barrel of water, or 1 lb. of potash to 12 gal. of water, to be used for scale insects like the barklouse. If a home-made lye is used, a bushel of good wood ashes contains about 4 lb. of potash.

Keep the spray pump going during Spring and Summer.

FRUIT TREES.

To Customers who are not acquainted with the various names of Fruit Trees, we would suggest that they leave the selection to us, intimating the purpose for which they are required, and we will select the very best kinds; it is also advisable to allow us some latitude in supplying orders, when we will substitute the nearest approach to it, if the variety ordered is not in stock; this will often save disappointment.

The following Lists of Fruit Trees comprise those kinds only which have been found to answer well in our climate, and are likely to give every satisfaction. We think giving lists of well-trying ones only is preferable to swelling them with a lot of inferior sorts, as is practised by many for the sake of appearance; and frequently not half the kinds catalogued can be supplied when ordered. Should any customer, however, require any kind not included in this Catalogue, we shall be happy to supply them, if procurable.

We mark with an asterisk the Apples, Cherries, Pears, and Plums most suitable for warm districts.

All the Japanese Plums and Persimmons are suitable

APPLES.

Varieties of Special Merit.

Barnack Beauty (new) Remarkable for its handsome appearance and good keeping quality; useful for kitchen or dessert. 2s. each.

Charles Ross Latest introduction from England; a cross between Cox's Orange Pippin and Peasgood Nonsuch. Gained first prize at Crystal Palace as a new dessert apple. Late. 1s 6d each.

Climax (new) A perfect blight-proof apple; fruit medium, waxy, yellow striped, crimson; ripens between Irish Peach and Gravenstein, therefore a valuable acquisition. 1s 6d each.

Coronation Splendid new dessert apple, oblate shape, suffused with reddish brown, streaked red on the sunny side. Awarded High Merit R.H.S., England. 2s each.

John Sharp Of New Zealand origin; perfectly blight-proof; a beautiful dessert apple of highest excellence, and keeping till August. 1s 6d each.

Mrs. Philimore A very pretty mid-winter dessert variety, remarkably sweet, and the trees compact in growth. New importation. 2s. each.

Norfolk Beauty Said to be the finest culinary apple in existence. Fruit very large, weighing up to $\frac{3}{4}$ lb., heavy bearer, delicious flavour when cooked, requiring very little sugar. 2s each.

Royal Snow Most highly valued apple in Canada on account of its beautiful crimson colour, delicious flavour, and most profuse bearing; flesh snow white with slight pink tinge under the skin. 6s each.

Royal Late A splendid late apple, keeps till new crop coming in; flesh straw-yellow, juicy, with a good acidous flavour. 2s each.

***Thorle Pippin** Medium size; its freedom from blight, bright colour, and hardness of the tree recommend it as an invaluable variety for all purposes. Ripens immediately after Irish Peach. Highly recommended for Sydney climate. 1s 6d each.

Apples - Special Merit—continued.

Weeping (new) (ELIZA RATTIKE)—A decorative as well as a productive sort; fruit medium, yellow; good keeper. 2s each.

Wolf River A magnificent and valuable apple; a good dessert, and yet most excellent cooker; it is very large, yet, unlike other apples, it does not drop. Colour yellow, ground-splashed, and striped lively red. 1s 6d each.

GENERAL LIST.

Worked on Northern Spy and Winter Majetin stocks, both of which are absolutely blight-proof, thus the roots are secure against the American Blight.

1s each; 10s 6d per dozen.

Special low quotations per 100 or 1000.

Apples, Cherries, Pears, and Plums marked with an asterisk (*) are suitable for warm climates.

ABBREVIATIONS.—Size—1, signifies Large; 2, Medium Size; 3, Small. Use—K, signifies Kitchen; D, Dessert; K D, Kitchen and Dessert. Season, or Time of Ripening—E, signifies Early; M, Medium; L, Late.

	Size.	Use.	Season.
Adam's Pearmain —Crisp, juicy, and rich	1	D	L
Alexander —Large, handsome, and good	1	K	M
Ailsopp's Early Red —A good showy market apple	2	K D	E
Annie Elizabeth —Large, late, showy apple	1	K D	L
Apple of Commerce —A new apple of astonishing beauty; largest size; picked in mid-season, keeps mellow and juicy for many months	1	K D	L

Archduke —Dark red, large and good	M
Bedford Prolific —White, very large and delicious	M
Belle Agathe —Medium size, good flavour, very late	L
Belle d'Orleans —Large, pale red fruit; an enormous cropper	E

To Messrs. P. L. C. SHEPHERD & SON.

GENTLEMEN.—I have much pleasure in informing you that the young fruit trees you sent to me to the British Consulate in New Caledonia gave me great satisfaction, and the packing for the voyage could not have been better. Of the first lots, the only ones that failed were some Persimmons, through being neglected during my absence in Europe—of the last lot of 32 trees you sent me not one failed, and when I left, two months ago, all were growing vigorously—the Quinces and Mulberries even fruiting. I am also informed by Mr. Conor, in the Seychelles Islands, off the coast of Africa, that the young trees and plants you sent him at my request have been most successful, notwithstanding their long voyage through the tropics and changes of steamers at Djibouti and elsewhere—the packing being excellent. You are at liberty to make what use you please of this letter.

I am, Gentlemen, faithfully yours,

JOHN G. HAGGARD, H.B.M.'s Consul.

Cherries—General List—continued.

	Season.
Bigarreau —Pale, richly flavoured and prolific	M
Christy's —A large mid-season Cherry of colonial origin	E

Peaches—Special Merit—continued.

Globe This is one of the most delicious peaches of the age. Golden yellow with red cheek; a freestone of the largest size, with firm, yellow flesh, pleasant, rich and juicy. 1s 6d each.

Kia Ora Seedling from Elberta; identical in size and general appearance, but of superior flavour and a much better cropper and hardier. 2s each.

La France Very large, dark carmine-red, melting, juicy and delicious, early. 2s each.

Red-Leaved Peach Remarkable for the colour of its foliage, in the Spring being of bright purple; as the season advances it changes to deep bronze. The blossom is handsome, and the fruit, which is produced abundantly, is of a fine flavour, clingstone and striped. 1s 6d each.

Reeves' Favourite (new) Large, yellow with red cheek; red at the stone, ripens a few days after Early Crawford. 1s 6d each.

Ruby Red A splendid peach coming in for Christmas market; light red colour, and valuable for shipping. 1s 6d each.

Sneed The earliest peach known; is said to ripen two weeks before Briggs' Red May. It is a seedling from Chinese Cling; fruit medium size, somewhat oval in shape; colour creamy white, with rich red blush on sunny side; ripens evenly, and is of fine quality. 1s 6d each.

The Signalman A first-class peach, coming in about beginning of February; it is the size of Lord Palmerston, white fleshed, beautiful red cheek and a perfect freestone. 1s 6d each.

Triumph The earliest yellow peach known; ripens about the middle of December; vigorous growth and good bearer. 1s 6d each.

Wonderful Of largest size, excellent quality; a regular and most prolific bearer, and in beauty excelled by no other peach. 1s 6d each.

GENERAL LIST.

1s each; 10s 6d per doz.

C signifies Clingstone and F Freestone.

	Season.	Kind.

Early Newington —A grand old favourite ...	E	C
Early Rivers —Large, pale yellow, very good ...	E	F
Elberta —Very large, yellow and red, good for drying ...	M	F
Flat China —The best peach for warm climates ...	E	F
Fraser's Newington —Highly coloured, large and good ...	E	C

PEACHES.

This is essentially the poor man's fruit. It comes into bearing the year after planting; will do in almost any soil; bears abundant crops of delicious fruit, which can be used for all purposes.

Varieties of Special Merit.

Admiral Dewey A new yellow-fleshed freestone, ripening with Triumph; skin deep orange-yellow, with crimson cheek; flesh clear yellow, juicy, melting, and of superb quality. 2s each.

Bell's November Ripening in the coast districts of N.S.W. early in November, thus proving, like Edward VII., one of the earliest peaches; partial slipstone. 1s 6d each.

Edward VII. Originated in this district, ripening in favourable seasons in October; medium size, commanding high price in the Sydney market 2s each.

A judicious selection of sorts will secure peaches for six months.

Peaches—General List—Continued.

Season. Kind.

Fulton —Large and good; one of the best late peaches ...	L	C
Golddust —Yellow, with red cheek; rich, yellow flesh, heavy bearer ...	L	G
Governor Garland —Highly flavoured, and fragrant ...	E	C

Yellow Italian —Extra large, a grand peach ...	L	C
„ Mundi —A fine old sort, good for kitchen	L	C
Double Red and Double White Flowering.		

PEARS.

The cooler districts are well adapted to the growth of this splendid fruit. It requires very little attention, and will continue to bear to a very old age. On Seedling Pear Stocks.

Varieties of Special Merit.

- Conference** Large, handsome, melting pear, very prolific. 1s 6d each
- Howell (new)** A first-class pear, following Williams Bon Chrétien, fruit large, of light waxen yellow; heavy bearer. 1s 6d each.
- Le Lectier** A grand new pear from Orleans, constant and regular bearer, highly perfumed. 1s 6d each
- Lincoln Coreless** A very fine dessert pear, nearly coreless, middle sized, melting and nicely coloured. 1s 6d each.
- Magnate** Large yellow, dark crimson and brown streaked; melting and juicy. 1s 6d each.
- Michaelmas Nelis** Seedling of Winter Nelis, imported from France; flesh fine, melting as its parent. 1s 6d each.
- Packham's Triumph** This pear was awarded first prize during last three Sydney Agricultural Shows. Of beautiful sugary flavour, melting and pleasantly perfumed, the trees are vigorous and exceedingly productive. 5s each; dormant buds, 2s each.
- P. Barry** Large pyriform; skin orange-yellow; flesh very juicy, buttery, fine, excellent flavour, and a long keeper; very late 1s 6d each.
- Red October** A very superior variety of B. Capiaumont. Bright brown tinged with orange-red; flesh delicate, smooth and rich; an abundant bearer. 2s each.
- Rutter** A seedless pear, ripening in March; size and quality like Williams' Bon Chrétien; very hardy and good colour. 1s 6d each.
- Wilder** One of the earliest; good keeper and shipper; fruit medium, pale yellow; flesh whitish yellow, fine-grained, tender; very productive; probably the best early market pear. 1s 6d each.

PLUMS.

The Plum may be grown in the lowest part of the orchard, and requires very little attention; it is a most useful and delicious fruit, and bears very heavy crops; useful for all purposes. On Seedling Plum or Peach Stocks.

Varieties of Special Merit.

- Giant** As the name indicates, a fruit of great size; flesh honey yellow, extremely sweet and firm; profuse bearer, good carrier, a real acquisition.
- Golden Prune** Originated from the Italian Prune. Fruit very large, light golden colour, exquisite flavour, dries beautifully. This is the best yellow prune, both for quality and productiveness. 1s 6d each.
- Lincoln** One of the best early plums, as large as Diamond, sweet, and a first-class dessert. 1s 6d each.
- President** Latest importation from England (Rivers), and splendid acquisition. Large egg-shaped, beautiful purple colour, covered with white minute dots; flesh firm and sweet; fruit perfect freestone; will be a splendid market variety, on account of its good keeping quality. 5s each; dormant buds, 2s each.
- Splendour** This is another magnificent prune, very productive, firm, rich, sugary, early, and twice the size of the French prune; a perfect freestone. 1s 6d each.
- Sugar Prune** This new prune is far superior to the French prune. The fruit is even in size and very large, early; yellow flesh, tender, and rich in sugar juice. 1s 6d each.
- Prune Tragedy** The fruit is quite large and elongated, with dark purple skin; the flesh is yellowish-green, and has a very rich flavour. 1s 6d each.

Japanese Plums.

Fruit bearing much sooner than our old kinds, often the second year after planting. As a market plum they promise to out-rival the old kinds. They are very hardy, heavy bearers, and will succeed in almost any soil or climate. Fruit very large.

America (HYBRID)—Growth resembles the American plum; fruit of large size, colour glossy coral red, flesh yellow, moderately firm and delicious. 1s 6d each.

Chalco Large, flat, reddish-purple, sweet, firm, yellow flesh; extremely prolific cropper, and superior shipping fruit. 1s 6d each.

Combination Raised by Luther Burbank, who describes it as a Japanese Plum. Early, regular and abundant bearer, fruit large and handsome, flesh straw colour, extremely sweet, with a pronounced pineapple flavour, 2s 6d each.

Federation Raised by R. H. Wright, Auckland, N. Z. A cross between Burbank and Wickson. Fruit resembling Wickson, habit of tree like an upright growing Burbank, ripening early in February. 2s 6d each.

Sultan (new) A cross between Wickson and Satsuma, producing large, oval-shaped fruit of deep purplish crimson; flesh firm and very sweet. 1s 6d each.

The Bartlett (new) Fruit flavour resembles the Williams' pear; tree vigorous, upright growth. 1s 6d each.

Wright's Early The earliest Japanese plum extant, ripening in N.S.W. end of November, fruit identical with Burbank, habit of tree growth more erect, an enormous cropper and bearing soon after planting. 3s 6d each.

GENERAL LIST.

1s each ; 12s per dozen.

Apple (HYBRID)—Fruit very large, of a deep reddish-purple colour, ripens soon after Burbank, and keeps for a long time.

Blood (Satsuma)—Very large, mottled skin, red flesh.

Botan—Large, red, delicious flavour.

Burbank—The largest and best flavoured of its class, skin cherry red.

Climax—Fruit very large, heart shaped, deep vermilion red; flesh yellow, sweet and delicious; ripening very early.

Gold—Handsome, luscious, golden fruits.

Golden Heart—An attractive variety, and good flavour.

Hale—Large round plum, skin deep cherry red, with yellow specks; flesh yellow.

Kelsey—Large, pale purple; one of the best.

Large Yellow—Skin and flesh yellow, sweet and rich.

Large Red—An abundant bearer, and good quality.

October Purple—Very fine large black purple fruit.

Prunus Pessardi—Very distinct foliage and excellent fruit.

Prunus Simoni—Very large, flat, early.

Red June—One of the best of the early varieties; fruit medium to large; purplish-red in colour; flesh pale yellow, firm and of excellent quality.

Wickson—Fruit of the largest size; skin white, suffused with a carmine blush.

JAPANESE PERSIMMONS

(DATE PLUM).

This delicious fruit is becoming year by year more popular. It requires a fairly good soil and shelter, and a little care until established, when it is perfectly hardy, and will stand a good deal of frost. The fruit ripens early in winter, which renders it valuable.

1s 3d each ; 12s dozen.

Dia Dia Maru—Large, flat fruit, almost seedless, a fine large variety.

Denji Maru—Medium size, with dark flesh.

Haycheya—Very large, highly flavoured, and few seeds.

Hayakume—Very large, brown flesh, rich flavour.

Jubilee—Large, late, and good.

Kuro Kumo—One of the largest, very good, and late.

Nitro—Flat, square shaped fruit, somewhat similar to Dia Dia Maru.

Seedless—A great favourite, and free bearer.

Tanenashi—Fruit similar to the Seedless, but larger, conical, and bright yellow.

Tsuno Magari—Tree vigorous, and abundant bearer, fruit very richly flavoured.

Tsuri Gaki—A delicious fruit of good size.

Yeddo Ischi—Medium size, late, and one of the best.

Yemon—Large, flat fruit, ribbed, and seedless.

Zenji Maru—Small, round, with brownish flesh.

QUINCES.

Highly esteemed for preserves and culinary purposes generally. The Quince will grow in low, moist soils, which are quite unsuitable for other fruits.

Varieties of Special Merit.

Bourget Ripens just after the Orange, and keeps till past mid-winter. The fruit is very large, rich golden colour, smooth, velvety skin. 1s 6d each.

Fuller Regular bearer, strong grower; The fruit ripens early, is one of the largest size, pyriform in shape, of clear, bright lemon-yellow colour, highly flavoured and tender. 1s 6d each.

Pineapple Fruit medium size, clear, golden yellow, makes a superior jelly, possessing most exquisite and delicious flavour. 2s each.

Van Deman The fruit is of most superb flavour, texture, and quality for all purposes that quinces are used, and a very early and heavy bearer. 1s 6d each.

GENERAL LIST.

1s each ; 10s 6d per dozen.

Angers—Large, golden yellow, free bearer.

Apple Shaped—Fine flavour; excellent for stewing.

Champion—Fruit very large, handsome, of delicate flavour and exquisite quince taste and odour.

Large Portugal—Very large and good.

Master's Early—The earliest, large and good.

Meeche's Prolific—Large pear-shaped fruit.

Missouri Mammoth—The fruit grows to an enormous size; of mild, pleasant flavour.

Orange—Large and highly perfumed.

Pear Shaped—Good all round.

Rea's Mammoth—Extra large; likes a warm position.

Our packing gives universal satisfaction.

FIGS.

This wholesome and delicious fruit is very easily grown in poor stony soils, where little else will grow; it produces several crops in the year.

White Adriatic (Special) Hardy and prolific, one of the best. 1s 6d each.

GENERAL LIST.

1s each; 10s per dozen.

Angelique—A green fig, free bearer and good quality.

Black Genoa—Very rich flavour and large.

Blue Province—Small and very productive.

Brown Ischia—Medium size, fine flavour.

Brown Turkey—One of the best, large and luscious.

De l'Archipele—Large, green, early, and very heavy bearing, sugary and rich.

Smyrna—The best kind for drying; green.

Signora di Nero—A great favourite fig in Victoria; green.

White Geneva—Very prolific and sweet.

Yellow Ischia—Sweet, rich, and excellent.

CITRUS FRUITS.

ORANGES.

The Orange may be grown in any moderately good soil, but the most favourable conditions for its successful cultivation are—a strong loamy soil gently sloping to the east or north, thoroughly drained and sheltered from prevailing winds. A few of the hardier kinds will stand a considerable amount of frost, particularly if protected the first winter after planting.

Varieties of Special Merit.

Charley Baker This orange has a high reputation for the excellent quality of its fruit and general productiveness. 1s 6d each.

Golden Nugget Navel Latest introduction from California. Fruit is said to be very smooth, solid, and even thinner skin than Washington Navel. Foliage lanceolate and very dark green, ripens early and carries well. 3s 6d each.

Holdfast Fruit large, remarkable for its hanging on the tree till late in the season. 1s 6d each; 15s per dozen.

Joppa One of the best of recent production; tree of strong growth and productive, fruit of nice size, and best quality. 1s 6d each.

Citrus Fruits—Oranges—Special Merit—continued.

Late Valencia A good-sized round orange; skin smooth and thin; valuable on account of its lateness in ripening; splendid flavour, and hangs well. 1s 6d each. 15s per dozen.

Navelencia Originated from Thompson's improved Navel and Valencia late, having all the good qualities of the former together with the late ripening qualities of the Valencia, thus making it the most valuable orange in cultivation. Fruit of good size, smooth and thin skinned. 5s each, stock limited.

Oonshi Seedless, very hardy; suitable for cold districts 1s 6d each, 15s per dozen.

Thompson's Improved Navel Fruit of medium size, smooth and thin skinned, comes early into bearing, colouring early, very highly valued in California. 3s 6d each, stock limited.

GENERAL LIST.

1s 3d each; 12s per dozen.

Bahia or Navel—Large, the King of Oranges; likes a warm situation.

Blood or Maltese—Medium size, remarkable from the blood colour of its flesh.

Crown or Star—Hangs late; distinct and good.

Homassassa—Medium size, bright yellow, smooth skin.

Jaffa—Fruit very large, and nearly seedless; flesh sweet and juicy. Tree thornless.

Mediterranean Sweet—This splendid orange is remarkable for its early bearing and late ripening qualities.

Paterson River Seedling—Large, heavy fruit, one of the best for market.

Paperrind, St. Michael's—A splendid fruit, one of the best market oranges.

Parramatta—Very large, hardy and prolific.

Queen—A good, hardy market fruit.

Siletta—Small, handsome and good.

St. Michael's—Large, thin-skinned, weighty, and the best for exportation.

Teneriffe—Medium sized, almost equal to St. Michael's first to ripen.

Variegated Leaved—Very pretty, with highly ornamental foliage. 1s 6d each.

Washington Navel—Equal in size and flavour to the old Navel, if not superior; very hardy and prolific; a grand orange. 1s 6d each, 15s per dozen.

MANDARINS.

Varieties of Special Merit.

Beauty of Glen Retreat A seedling raised near Brisbane, and is, by all experts, pronounced to be far superior to any other kind. 1s 6d each, 15s per dozen.

Parker's Special A Queensland seedling raised by Mr. Parker, said to be of large size and equal in quality to Beauty of Glen Retreat. The fruit ripens earlier in Queensland than any other. 1s 6d each.

These two sorts are specially recommended for warm climates, where other sorts fail to do well.

Carefully top and root-prune young trees before planting.

Citrus Fruits—Mandarins—continued.

GENERAL LIST.

1s 3d each; 12s per dozen.

Emperor—Very large, regular bearer.

Thorny—Medium-sized, solid and highly flavoured.

Scarlet (Canton)—Fruit large, very flat in shape, colour almost scarlet; free bearer.

Navel—A variety of the thorny mandarin; sweet and highly flavoured; robust habit and large foliage.

Preserving Varieties.

Cumquat (oval)—Fruit small and handsome; makes a splendid preserve.

Cumquat (flat)—Tree hardy and very productive; fruit agreeable to the palate when fully ripe.

Poor Man's Orange—Very large, splendid for Marmalade, and pleasant to take when fully ripe.

Seville Orange, Bitter—Best of all for marmalade.

” ” **Flat**—This sort is rather distinct from the common, the fruit being more flat and smooth.

” ” **Navel**—A very fine smooth fruit, and good cropper.

Tangerine—Fruit small, round, rough; esteemed for preserves.

LEMONS.

Varieties of Special Merit.

Messina Worked from imported scions. 1s 6d each.

Villa Franca Claimed to be chiefly a summer bearing lemon. It is a strong vigorous grower, with few thorns; fruit oblong, thin skinned, and firm. 1s 6d each.

GENERAL LIST.

1s 3d each; 12s per dozen.

Common—Well known, rough skinned, very hardy.

” **Variegated**—Very pretty foliage; fruit like common lemon.

Eureka—Almost thornless. Fruit more oblong than the Lisbon, and of excellent quality.

Genoa or Thornless—Equal in every way to the Lisbon.

Heong Long—Fruit very large, but coarse; good for candied peel; very distinct. 1s 6d each.

Lisbon—The best for all purposes.

Lisbon Variegated—Leaves and fruit beautifully variegated.

LIMES.

1s 3d each; 12s per dozen.

Tahitian—A strong grower and heavy cropper; fruit nearly the size of a Lisbon lemon; exceedingly thin rind, juicy, and nearly seedless; for hot districts considered superior to the lemon. 1s 6d each.

East Indian—Fruit large.

Citrus Fruits—Limes—continued.

Persian or Sweet—Hardy and productive; fruit sweet and of pleasant flavour.

West Indian—Small and excellent; best for lime juice.

CITRONS.

1s 3d each; 12s per dozen.

Lyman—Fruit said to be superior to varieties hitherto grown in Australia, the rind being sweet and edible when ripe, making a most delicious conserve. 1s 6d each.

Bengal—Enormous size and a good preserve.

Common—Fruit pointed, used for candied peel.

Knight's—Large and good for candied peel.

SHADDOCKS.

1s 3d each.

Common—Very large, with sour juice.

Blood—Large, solid, juice sweet; excellent for preserving purposes.

MISCELLANEOUS FRUITS

Bananas A most useful and delicious fruit; grows freely in any ordinary garden soil.

Cavendishi (Fiji) — 1s 6d.

Gros Michael — This variety is a much hardier and taller variety than Cavendishi, also it produces much larger bunches. The fruit is of splendid quality, and it being disease-resisting should be a good recommendation to growers. Plants 2s each; 20s per dozen.

Sapientum (Common) — 1s 6d.

Sugar—2s.

Williams' Hybrid— A hybrid between Cavendishi and the celebrated Gros Michael, is, as the last-named, quite disease-resisting; grows 1½ to 2 feet taller than Cavendishi. The bunches are very large. The fruit is large, sweet and delicious. Plants 2s 6d each; 24s per dozen.

Miscellaneous Fruits—continued.

Custard Apple A delicious fruit, large, and flavoured like a custard. 1s each.
(Cherimoyer.)

Chinese Raisin Flavour like raisins. 1s each.
(Hovenia Dulcis.)

Date—Of Commerce, very ornamental. 1s each.

Guavas A very useful fruit, and easily grown in any ordinary soil. 1s each.

Purple—The well-known Guava Jelly is made from this variety; it also forms a handsome shrub.

Yellow or Pear-shaped Guava.

Parker's Hybrid—Very large, pear-shaped.

Loquats A valuable fruit, ripening in early Spring, when fruit is scarce; excellent for culinary purposes.

Common—Very hardy and a heavy cropper. 1s each; 9s per dozen.

Mammoth—Immense size and fine flavour. 1s 6d each; 12s per doz.

Medlars A fruit of little value, and very little used; requires keeping until quite soft after gathering; all of similar quality. 1s each.

Dutch.

Monstrous.

Mulberries A useful fruit for either kitchen or dessert. 1s 3d each; 15s per dozen.

Black English—The best for all purposes.

Downings—Produces large fruit for a lengthened period.

Hicks—Similar to Downings, but a freer bearer.

Cape—The hardiest, fruits small, useful for cooking. 1s. each.

Olives Useful for pickling and for salad oil; hardy and produces immense crops of fruit in any fairly good soil. A few choice kinds. 2s each; 18s per dozen.

Passion Fruit Edulis may well be termed the "Poor Man's Fruit." It will grow and produce enormous crops of the most delicious and wholesome fruit during many months in the year, in almost any soil or situation.

Edulis—Invaluable for table, jams, etc.; an immense cropper. 6d each; 4s per dozen.

Quadrangularis—(*granadilla*)—Very large and good for warm climates. 1s 6d each.

Pineapple

Common—Hardy and good. 6d each.

Queen—Very large and good. 1s each.

Pomegranate

Ordinary—Agreeable fruit; the rind is used in medicine. 1s each.

Paper Rind—Superior to the above as a fruit. 1s each.

Roseapple A handsome shrub, fruit perfumed. 1s each.

NUTS.

ALMONDS.

No fruit garden should be without one or two trees. Home grown almonds are a real luxury.

Varieties of Special Merit.

Burbank's Seedling Very hardy and heavy cropper, suitable for our climate. 1s 6d each.

Golden State A great bearer; very large and soft shell. 1s 6d each.

GENERAL LIST.

1s each; 10s 6d per dozen.

Brande's Jordan—Soft shell and prolific.

I.X.L.—Large, and perfect shell.

Jordan—An old favourite.

Nonpareil—A weeping habit; thin shell.

Papershell—The best of all.

CHESTNUTS.

Japanese Mammoth—Large fruit, and suitable for warm climate. 2s each.

Spanish or Sweet—The Chestnut of Commerce. 1s 6d each.

FILBERT AND HAZEL.

Useful fruits adapted for cold districts.

1s each; 10s 6d per dozen.

Hazel

Red Filbert

White Filbert

QUEENSLAND NUT.

(*Macadamia ternifolia*).

A splendid ornamental tree; evergreen; produces edible nuts in profusion. 1s each.

WALNUTS.

Ordinary—1s 6d each

Dwarf—Fruiting earlier than above. 1s 6d each.

Japan—Hard-shelled, fine flavour and prolific. 2s each.

Pecan Nut—Heavy and regular cropper, and fine flavour. 2s 6d each.

Always mistrust Trees and Seeds sold below market value.

CURRANTS.

This useful fruit is well adapted for the colder districts and good rich soil. 9d each ; 6s per dozen.

Black Naples	La Fertile (red)
Champion Black	La Versailles (red)
Fray's Prolific (red)	Lee's Prolific (black)
Knight's (Red)	Red Dutch.

White Dutch.

GOOSEBERRIES.

Well-known fruits, suited to the cold districts. 9d each ; 8s per dozen.

GREEN—	RED—
Greenwood	Crown Bob
Lancashire Hero	Roaring Lion

Whinham's Industry One of the finest and most profitable gooseberries in existence. Fruit of enormous size, and, when ripe, of a dark, dusky red colour. It is of fine quality, and cannot be surpassed for preserving. The plant is of robust growth, and a marvel of productiveness. 1s each ; 10s 6d per dozen

Thornless Gooseberries (new)

1s each ; 10s 6d per doz.

Belle de Maux—Dark red, oval shaped.
Edward Lefoit—Red, vinous flavour.
Madame Edward Lefoit—Red, vinous flavour.
Souvenir de Billiard—Dark rose, good bearer.

RASPBERRIES.

A most useful fruit of easy culture, delicious either for dessert or preserves.

2s 6d per dozen ; 15s per 100.

Antwerp Red—Large and fine flavour.

Antwerp White—Large and very sweet.

Cuthbert—Large, red, fine flavour.

Flagstaff—Red, and fine flavour.

Golden Queen—Cream colour.

Northumberland Fillbasket—Deep red, large and fine.

Victoria—Large, red, flavour excellent.

Thornless Northumberland Fillbasket

Fruit similar to the old Fillbasket, but the canes are free of thorns, thus greatly facilitating the gathering of the fruit. 3s 6d per dozen ; 20s per 100.

BLACKBERRIES.

English—6d each ; 4s per doz.

Himalayan—1s each.

Laughton—6d each ; 4s per doz.

The Logan Berry The fruit is sometimes an inch and a quarter long, the shape of a blackberry, the colour of a dark red raspberry, and a combination of the flavours of both. The stems are strong, free from thorns, but covered with fine spines, having a trailing habit, and the fruit is borne in great profusion. 1s each.

Lucretia Dewberry

Trailing Blackberry, bears profusely in any climate, fruit delicious. 6d each. 3s per dozen.

Lucretia Dewberry.

Japanese Golden Mayberry (*Rubus incisus*) A strong growing variety of the bramble class, luscious berries of a golden colour. 9d each ; 6s per dozen.

STRAWBERRIES.

Strawberries do best in strong loam, approaching clay, and may be planted in beds, or to form edgings in a fruit or vegetable garden. Planting may be commenced in March, and continued throughout the winter.

NEW STRAWBERRY.

Annetta Although not exactly a novelty, the plants of this grand variety have not before been offered to the public. This variety originated in Queensland and has been since its inception the early berry of the season; it arrives in Sydney at times in June, and always early in July. The fruit is a great favourite in the Sydney market, both for its size and delicious flavour. Its colour is bright pink, and usually with a square point. It has proved such an enormous success that whole districts are cultivating only this sort, on account of its earliness, enormous size, hardness and productiveness. The plants are wonderfully hardy, standing well extremes of temperature, and may be said to be disease-proof. Plants, 7s 6d per 100 ; 1s 6d per dozen.

When in doubt what to order, leave the selection to us.

Strawberries—continued.

GENERAL LIST.

- Bidwell's Seedling**—A late variety and will prove a splendid market variety. **5s** per 100.
- British Queen**—Very rich flavour, requires cold climate. **5s** per 100.
- Creswell's Seedling**—An excellent hardy variety. **5s** per 100.
- Dr. Moree**—The fruit is large and of a beautiful appearance, and very fine flavour. **5s** per 100.
- Edith**—Good cropper and fine flavour. **5s** per 100.
- Glenfield Beauty**—Fruit produced in bunches; rich flavour and colour, free grower. **5s** per 100.
- Golden's Beauty**—A second early variety of good size and flavour. **5s** per 100.
- Governor General**—Good flavour, size and appearance. **5s** per 100.
- Hautbois (White Chilian)**—An old favourite. **7s 6d** per 100.
- Laxton's Noble**—The prolific and handsome Strawberry. Fruit of immense size, bright crimson, very rich, and delicious. An enormous bearer, producing bunches of large berries; ripens very early. Plants **7s** per 100.
- Marguerite**—Heavy cropper and good quality. **5s** per 100.
- Melba**—Is large, brilliant red, and of the best flavour; it will bear good crops from beginning of November to May. **5s** per 100.
- Red Alpine** (Everbearing)—A small wild strawberry from Northern Italy, where it is highly prized on account of its beautiful flavour and continuous bearing. **5s** per 100.
- Royal Sovereign**—Fruit of the largest size, conical and sometimes flattened in shape; glossy scarlet, flesh firm and white, flavour rich and vinous. **6s** per 100.
- Sir Harry Rawson**—Fruits are very large, of exquisite flavour and bright appearance. The best spring strawberry grown; in a moist situation it gives best result. **7s 6d** per 100.
- Trollope's Victoria**—The best all round strawberry; early. **5s** per 100.
- Uptut Mark**—The fruit is large, bright red, and of splendid flavour; a grand variety. **5s** per 100.

GRAPES.

One of the most delicious, refreshing fruits, of the easiest culture, succeeding in almost any soil, and producing fruit in abundance. All rooted vines supplied by us are submerged in a solution of sulphate of potash and fumigated under the supervision of the Government Inspector, so there need be no fear of disease.

Varieties of Special Merit.

- BARBAROSSA**—Very large bunch, berry black, with beautiful bloom, fine flavour. **1s**.
- BLACK MAMMOTH (BLACK ADELAIDE)**—A new and very handsome black grape, valuable for its lateness and extra large bunches. **1s** each.
- BLACK SHERRY**—A valuable late grape, of excellent flavour; bunch and berry large. **1s** each.

Grapes—Varieties of Special Merit—continued.

- CENTENNIAL**—Certainly the largest and most showy white grape ever introduced; berries about two inches in circumference, forming a beautiful, long and complete bunch of great weight. **1s** each.
- CHAMPION MUSCAT**—Recently introduced. Berries very large and round, of deep red colour; very high muscat flavour. **1s** each.
- DARIA DEL ALMERIA**—A fine light amber colour and large berries; has proved itself the largest grape in Sydney market. **1s** each.
- EMPEROR**—A splendid new grape, producing large bunches of berries of a dark red colour; hangs until April. **1s** each.
- HANEFORT RED**—This grape is largely cultivated in South Africa as a raising grape; resembles Gordo Blanco, having the same rich flavour and sugary qualities; a good bearer. **1s** each.
- HANEFORT WHITE**—The same qualities as the above and only differing in colour. **1s** each.
- LADY'S FINGER**—White, very long and attractive. **1s**.
- PRINCESS ALEXANDRIA**—Large bunches, pinkish purple, delicate muscat flavour. **1s** each.
- ROSE OF PERA**—Berries medium, of a good red colour, with a slight purplish bloom, most delicious flavour, juicy and very sugary; bunches attaining enormous size. **1s** each.
- SABAL KANSKY**—Said to be the Imperial table grape of Russia. Very handsome coppery red, oval, tapering at the ends; fresh, sweet and crackling, superior in flavour to Tokay, and on account of its firmness good for shipping. **1s** each.
- THOMPSON'S SEEDLESS**—A raisin grape, said to be superior to Sultana, which variety it resembles in vigorous growth. **1s** each.
- WALTHAM CROSS**—Bunches very large and tapering, berries oblong oval, skin pale amber; one of the largest. **1s** each.

GRAFTED ON PHYLLOXERA-RESISTING STOCKS.

1s each; **10s 6d** dozen.

We have the pleasure to offer the following grapes grafted on the Vitis Riparia varieties. They are of vigorous growth and well rooted, but stocks being very limited, orders have to be placed early to secure execution.

Murchison's Scrub Exterminator.

A WONDERFUL invention for destroying trees, scrub, and weeds, without injuring the fertility of the soil; crops may be sown or planted with perfect safety a fortnight after the specific has been used. The following have been operated upon with complete success:—Eucalyptus sorts, Briars, Acacias, Prickly Pear, Ferns, Docks, Couch, and all kinds of noxious weeds. For carriage drives, gardens, walks, etc., the Exterminator is invaluable, as in its application it is not necessary to disturb or break up the surface, but simply to sprinkle the weeds with the specific. Directions for use forwarded with each parcel.

100 lb. Cases, £2 10s. 50 lb. Cases, £1 5s. 10 lb. Cases, 6s.

Parcels under 10 lb., 8d. per lb.

Use our Scrub Exterminator to keep your walks clean.

Thorley's Specialties for Stock.

WE HAVE pleasure in informing you that we have been appointed Sole Agents for New South Wales for these famous specialties. In England wherever stock of any description is kept THORLEY'S FOODS AND CONDIMENTS are in regular use. They have been on the market for over fifty years, and if they were not the very best that are made the sales would not have increased in the way they have. We can heartily recommend their use.

HERE ARE SOME OF THE VARIETIES WITH PRICES:—

Thorley's Food for Cattle.

A CONDIMENT FOR ALL STOCK.]

FATTENING STOCK fed on food seasoned with this valuable tonic put on flesh rapidly, keep in the pink of condition, and always have that thrifty look about them that is so much prized by Feeders.

HORSES—By the use of Thorley's Food horses are kept in perfect health, have a sleek, glossy coat, staying powers are increased, fortifies their constitution, and coaxes the appetite when all other means have failed.

COWS—Thorley's Food increases the quantity and improves the quality of milk and butter. This is why it is used by such large numbers of experienced cow-keepers.

SHEEP should have a small quantity of Thorley's mixed with their trough food. It increases the flow of milk in suckling ewes, and causes them to lay on flesh rapidly. Numerous sheepbreeders have given their unsolicited testimony as to its value.

PIGS—Health and rapid development are the results secured by feeding regularly with Thorley's Food. In feeding young pigs for early slaughter as porkers, or older animals for bacon, nothing causes them to advance so rapidly as impregnating their trough food regularly with Thorley's Food.

THORLEY'S FOOD will convert the common hay and straw into superior provender if used when chaff-cutting. It effectually restores rain-damaged hay, and imparts a pleasant flavour and aromatic smell, and makes it almost equal to the best in flavour and feeding value. All horses, cattle and sheep eat chaff seasoned with Thorley's Food with relish, and not a portion of it is wasted.

Particular attention should be paid to this fact, that Thorley's Food is only to be used as a condiment, and therefore, whatever may be the food, it must be properly mixed with it, similar to the manner in which farmers and cow-keepers mix condiments with their own food. Of course different kinds and qualities of food will require different quantities of condiment to season them. Again, animals, though equal in size, but differing in health and constitution, will require their food seasoned differently; consequently it must be understood that the directions for use of Thorley's Food do not interfere with the professional duties of the farmer and veterinary surgeon. Among animals the organs of smell and taste are extremely sensitive; hence the reason why some animals decline at first to eat food seasoned with Thorley's Food is because they have no experience of it; but even these, after they have found its benefits, eat it greedily. This is a wise provision on the part of Nature, and should not be abused, but on the contrary, by using a small quantity of Thorley's Food at the first, gradually increasing it to the full allowance.

Price—2d per pkt., 1/10 per doz., 2/- per gross.

Thorley's Lactifer. A MEAL FOR CALVES.

All who desire to rear strong healthy calves should use as a milk substitute Lactifer—Thorley's perfectly cooked calf meal. Price—14 lb. bag 4s 10d, 5d per lb.

Thorley's Ovum.

A SPICE FOR POULTRY.

Ovum is a condimental preparation specially adapted for Poultry.

The use of Ovum also improves the plumage and beautifies the feathers while it is well known that all kinds of Poultry pass through the critical period of moulting far more easily if Ovum be added to their soft food.

Price—2d per pkt., 1s 11d per doz., 22s per gross.

Thorley's Grula. A GRUEL FOR HORSES.

Grula is a concentrated meal, which when mixed in water forms an exhilarating and refreshing drink for horses. Grula is packed in handy packets that can be carried in the pocket. Grula only needs once trying to prove its superiority over oatmeal and flour.

Price—2d per pkt., 1s 11d per doz., 22s per gross.
